## BEFORE USING THE PRODUCT, besure toreao the folowng:

## To maintain safety:

To ensure the safe operation of this product, be sure to read the following before usage. The following instructions are intended for the users, operators and the personnel in charge of the operation of the product. After carefully reading and sufficiently understanding the warning displays and cautions, handle the product appropriately. Be sure to keep this manual close to the product or in a convenient place for future reference.
Herein, explanations which require special attention are enclosed with dual lines. Depending on the potentially hazardous degrees, the terms of DANGER, WARNING, CAUTION, etc. are used. Be sure to understand the contents of the displays before reading the text.

DANGER
Indicates that mishandling the product by disregarding this pictograph will cause severe injury or death.

Indicates that mishandling the product by disregarding this warning will cause a potentially hazardous situation which can WARNING result in death or serious injury.

CAUTION

Indicates that mishandling the product by disregarding this caution will cause a slight hazardous situation which can result in personal injury and/or material damage.

For the safe usage of the product, the following pictographs are used:

Indicates "HANDLE WITH CARE." In order to protect the human body and equipment, this display is attached to places where the Owner's Manual, Serviceman Manual and/or Service Manual should be referred to.

Indicates a "Protective Earth Terminal." Before operating the equipment, be sure to connect it to the Ground.
(The step may be omitted for products in which a power cord with earth is used.)

- Perform work in accordance with the instructions herein stated.

Instructions for work are explained by paying attention to the aspect of accident prevention. Failing to perform work as per the instructions can cause accidents. In the case where only those who have technical expertise should perform the work to avoid hazardous situation, the instructions herein state that the site maintenance personnel should perform such work.

- Be sure to turn off the power before working on the machine.

To prevent an electric shock, be sure to turn off the power before carrying out any work that requires direct contact with the interior of the product. If the work is to be performed in the power-on status, the Instruction Manual herein always states to that effect.

- Be sure to ground the Earth Terminal. (This is not required in the case where a power cord with earth is used.) This product is equipped with the Earth Terminal. When installing the product, connect the Earth Terminal to the "accurately grounded indoor earth terminal" by using an earth wire. Unless the product is grounded appropriately, the user can be subject to an electric shock. After performing repair, etc. for the control equipment, ensure that the Earth Wire is firmly connected to the control equipment.
- Ensure that the Power Supply used is equipped with an Earth Leakage Breaker. This product does not incorporate the Earth Leakage Breaker. Using a power supply which is not equipped with the Earth Leakage Breaker can cause a fire when earth leakage occurs.
- Be sure to use fuses which meet the specified rating. (Only for the machines which use fuses.)
Using fuses exceeding the specified rating can cause a fire and an electric shock.
- Specification changes (removal of equipment, conversion and addition) not designated by SEGA are not allowed.
The parts of the product include warning labels for safety, covers for personal protection, etc. It is very hazardous to operate the product by removing parts and/or modifying the circuits. Should doors, lids and protective parts be damaged or lost, refrain from operating the product, and contact where the product was purchased from or the office herein stated.
SEGA shall not be held responsible for any accidents, compensation for damage to a third party, resulting from the specifications not designated by SEGA.
- Ensure that the product meets the requirements of appropriate Electrical Specifications.
Before installing the product, check for Electrical Specifications. SEGA products have a nameplate on which Electrical Specifications are described. Ensure that the product is compatible with the power supply voltage and frequency requirements of the location. Using any Electrical Specifications different from the designated Specifications can cause a fire and an electric shock.
- Install and operate the product in places where appropriate lighting is available, allowing warning labels to be clearly read.
To ensure safety for the customers, labels and printed instructions describing potentially hazardous situations are applied to places where accidents can be caused. Ensure that where the product is operated has sufficient lighting allowing the warnings to be read. If any label is peeled off, apply it again immediately. Please place an order with where the product was purchased from or the office herein stated.
- When handling the monitor, be very careful. (Applies only to the product with a monitor.)
Some of the monitor (TV) parts are subject to high tension voltage. Even after turning off the power, some portions are still subject to high tension voltage sometimes. Monitor repair and replacement should be performed only by those technical personnel who have knowledge of electricity and technical expertise.
- Be sure to adjust the monitor/projector properly.
(Applies only to the product with a monitor/projector.)
Do not operate the product leaving on-screen flickering or blurring as it is. Using the product with the monitor/projector not properly adjusted may cause dizziness or a headache to an operator, a player, or the customers.
- When transporting or reselling this product, be sure to attach this manual to the product.
In the case where commercially available monitors and printers are used in this product, only the contents relating to this product are explained herein. Some commercially available equipment has functions and reactions not stated in this manual. Read this manual together with the specific Instruction Manual of such equipment.
* Descriptions herein contained may be subject to improvement changes without notice.
* The contents described herein are fully prepared with due care. However, should any question arise or errors be found, please contact SEGA.

## INSPECTIONS IMMEDIATELY AFTER TRANSPORTING THE PRODUCT TO THE LOCATION

Normally, at the time of shipment, SEGA products are in a status allowing for usage immediately after transporting to the location. Nevertheless, an irregular situation may occur during transportation. Before turning on the power, check the following points to ensure that the product has been transported in a satisfactory status.

Are there any dented portions or defects (cuts, etc.) on the external surfaces of the cabinet?
Are Casters and Adjusters damaged?
$\square$ Do the power supply voltage and frequency requirements meet with those of the location?
Are all wiring connectors correctly and securely connected? Unless connected in the correct way, connector connections can not be made accurately. Do not insert connectors forcibly. Do power cords have cuts and dents?
Do the fuses used meet specified ratings? Is the Circuit Protector in an energized status?
Are all accessories available?
$\square$ Can all Doors and Lids be opened with the Accessory Keys? Can Doors and Lids be firmly closed?

## INTRODUCTION

This manual is intended to provide detailed descriptions together with all the necessary information covering the general operation of electronic assemblies, electro-mechanicals, servicing control, spare parts, etc. for the product, "HARLEY-DAVIDSON ${ }^{\circledR}$ KING OF THE ROAD."

This manual is intended for the owners, personnel and managers in charge of operation of the product.
Operate the product after carefully reading and sufficiently understanding the instructions.
In the unlikely event that the product does not function correctly, DO NOT allow anyone other than a technician to touch the internal system. Turn off the power to the machine, making sure to unplug the electrical cord from the outlet, and contact the office listed below or the point-of-purchase for this product.

Use of this product is unlikely to cause physical injuries or damage to property. However, points that require special attention are indicated by bold text, the word "IMPORTANT" and the symbol below.
(\%08) PORTANT

Indicates important information that, if ignored, may result in the mishandling of the product and cause faulty operation or damage to the product.

## SPECIFICATIONS

| Installation space | $60 "$ (width) x 95" (depth) |  |
| :--- | :--- | :--- |

## AHARNNG

Procedures not described in this manual or marked as 'to be carried out by site maintenance personnel or other qualified professionals' should not be carried out by personnel without the necessary skill or technology. Work carried out by unqualified persons may cause serious accidents, including electrocution.

Parts replacement, maintenance inspections and troubleshooting should be carried out by site maintenance personnel or other qualified professionals. This manual includes directions for potentially dangerous procedures which should only be carried out by professionals with the appropriate specialized knowledge.

The site maintenance personnel or other qualified professionals mentioned in this manual are defined as follows:
Site maintenance personnel:
Individuals with experience in maintaining amusement equipment, vending machines, etc., working under the supervision of the owner/operator of this product to maintain machines within amusement facilities or similar premises by carrying out everyday procedures such as assembly, maintenance inspections, and replacement of units/ expendable parts.

Activities to be carried out by site maintenance personnel:
Amusement equipment/vending machine assembly, maintenance inspection and replacement of units/expendable parts.

## Other qualified professionals:

Persons employed by amusement equipment manufacturers, or involved in design, production, testing or maintenance of amusement equipment. The individual should have either graduated from technical school or hold similar qualifications in electrical/electronics/mechanical engineering.

## Activities to be carried out by other qualified professionals:

Amusement equipment/vending machine assembly, repair/adjustment of electrical/electronic/mechanical parts.

## 1 HANDLING PRECAUTIONS

When installing or inspecting the machine, be very careful of the following points and pay attention to ensure that the player can enjoy the game safely.
Non-compliance with the following points or inappropriate handling running counter to the cautionary matters herein stated can cause personal injury or damage to the machine.

## ATMANNG

- When working with the product, be sure to turn the power off. Working with the power on may cause an electric shock or short circuit.
- To avoid an electric shock or short circuit, do not plug in or unplug quickly.
- To avoid an electric shock, do not plug in or unplug with a wet hand.
- Do not expose power cords or ground wires on the surface, (floor, passage, etc.). If exposed, the power cords and ground wires are susceptible to damage. Damaged cords and wires can cause an electric shock or short circuit.
- To avoid causing a fire or an electric shock, do not put things on or damage the power cords.
- When, or after installing the product, do not unnecessarily pull the power cord. If damaged, the power cord can cause a fire or an electric shock.
- In case the power cable is damaged, ask for a replacement through where the product was purchased from or the office herein stated. Using the cord as is damaged can cause fire, an electric shock or leakage.
- Be sure to perform grounding appropriately. Inappropriate grounding can cause an electric shock.
- Be sure to use fuses meeting the specified rating. Using fuses exceeding the specified rating can cause a fire or an electric shock.
- Be sure that connections such as IC BD are made properly. Insufficient insertion can cause an electric shock.
- Specification changes, removal of equipment, conversion and/or addition, not designated by SEGA are not permitted.
- Failure to observe this may cause a fire or an electric shock. Non-compliance with this instruction can have a bad influence upon physical conditions of the players or the onlookers, or result in injury during play.
- SEGA shall not be held responsible for damage, compensation for damage to a third party, caused by specification changes not designated by SEGA.
- If work or parts replacement not indicated in this manual is carried out, an accident may occur. If it is necessary to carry out work not indicated in this manual, be sure to have it done by the office indicated in this manual or by the point of purchase. Also, please inquire regarding details of the work involved.
- Be sure to perform periodic maintenance inspections herein stated.
- For the IC board circuit inspections, only the logic tester is allowed. The use of a multiple-purpose tester is not permitted, so be careful in this regard.
- Static electricity from your body may damage some electronics devices on the IC board. Before handling the IC board, touch a grounded metallic surface so that the static electricity can be discharged.
- This product uses a DLP projector. DLP projector screens scratch easily, so be careful when cleaning the screen. See Chapter 13 ("DLP Projectors") for details.
- Some parts are not designed and manufactured specifically for this game machine. The manufacturers may discontinue, or change the specifications of such general-purpose parts. If this is the case, SEGA cannot repair or replace a failed game machine whether or not a warranty period has expired.

## CONCERNING THE STICKER DISPLAY

This SEGA product has stickers attached describing the product manufacture No. (Serial No.) and Electrical Specifications. It also has a Sticker describing where to contact for repair and for purchasing parts. When inquiring about or asking for repairs, mention the Serial No. and Name of Machine indicated on the Sticker. The Serial Number indicates the product register. Identical machines could have different parts depending on the date of production. Also, improvements and modifications might have been made after the publication of this manual. In order to ensure you order the correct parts, mention the Serial No. when contacting the applicable places.

## CONCERNING WARNING DISPLAYS

This SEGA product has warning displays on stickers, labels and/or printed instructions adhered/attached to or incorporated in the places where a potentially hazardous situation could arise. The warning displays are intended for accident prevention for customers and for avoiding hazardous situations relating to maintenance and servicing work. Some portions of the cabinet contain high voltage and may cause accidents if touched. When performing maintenance, be very careful of the warning displays. It is especially important that any complex repair and replacement work not mentioned herein should be performed by those technical personnel who have knowledge of electricity and technical expertise.
In order to prevent accidents, caution any customer ignoring the warnings to cease and desist immediately.

440-WS0354-EG

## 2 PRECAUTIONS REGARDING INSTALLATION LOCATION

## AHAPNNG

This product is an indoor game machine. Do not install it outside. Even indoors, avoid installing in places mentioned below so as not to cause a fire, electric shock, injury and/or malfunction.

- Places subject to rain or water leakage, or places subject to high humidity in the proximity of an indoor swimming pool and/or shower, etc.
- Places subject to direct sunlight, or places subject to high temperatures in the proximity of heating units, etc.
- Places filled with inflammable gas or vicinity of highly inflammable/volatile chemicals or hazardous matter.
- Dusty places.
- Sloped surfaces.
- Places subject to any type of violent impact.
- Vicinity of anti-disaster facilities such as fire exits and fire extinguishers.
- Areas where the temperature exceeds the applicable temperature (ambient temperature) range of 5 to 30 degrees centigrade.

## 2-1 LIMITATIONS OF USAGE

## ANPNNG

- Be sure to check the Electrical Specifications. Ensure that this product is compatible with the location's power supply, voltage, and frequency requirements. A plate describing Electrical Specifications is attached to the product. Noncompliance with the Electrical Specifications can cause a fire and electric shock.
- This product requires a breaker and earth mechanism as part of the location facilities. Using the product without these can cause a fire and electric shock.
- Be sure to use an independent power supply equipped with an earth leakage breaker. Using a power supply without an earth leakage breaker can cause an outbreak of fire if a power surge occurs.
- Putting many loads on one electrical outlet can cause generation of heat and a fire resulting from overload.
- Ensure that the indoor wiring for the power supply is rated at 15 A or higher (AC single phase $100 \mathrm{~V} \sim 120 \mathrm{~V}$ area), and 7 A or higher (AC $220 \mathrm{~V} \sim 240 \mathrm{~V}$ area). Non-compliance with the Electrical Specifications can cause a fire and electric shock.
- When using an extension cord, ensure that the cord is rated at 15 A or higher (AC $100 \mathrm{~V} \sim 120 \mathrm{~V}$ area) and 7 A or higher (AC $220 \mathrm{~V} \sim 240 \mathrm{~V}$ area). Using a cord rated lower than the specified rating can cause a fire and electric shock.

Electricity Consumption:

$$
\begin{array}{ll}
\text { MAX. 6.12 A } & (\text { AC } 120 \mathrm{~V}, 60 \mathrm{~Hz}) \\
\text { MAX. 3.20 A } & (\text { AC } 230 \mathrm{~V}, 50 \mathrm{~Hz}) \\
\text { MAX. } 3.09 \mathrm{~A} & (\text { AC } 240 \mathrm{~V}, 50 \mathrm{~Hz})
\end{array}
$$

## 2-2 OPERATION AREA

## AWARNNG

- For safe operation, use and operate this product in an area measuring at least $2,000 \mathrm{~mm}$ in width and $2,600 \mathrm{~mm}$ in depth.
- Be sure to provide sufficient space specified in this manual. Do not allow objects to block the ventilation ports. It can cause generation of heat and a fire.
- SEGA shall not be held responsible for damage, compensation for damage to a third party, resulting from the failure to observe this instruction.
- The ceiling where this product is installed must be at least $2,400 \mathrm{~mm}$ high. If the ceiling is too low, the heat emitted from the product may cause it to catch on fire.

## (709 P PATTANT

For transporting the machine into the location's building, the minimum necessary dimensions of the opening (of doors, etc.) are $900 \mathrm{~mm}(W)$ and $1,400 \mathrm{~mm}(\mathrm{H})$

(Unit: mm)
2-2 FIG. 01

## 3 PRECAUTIONS REGARDING PRODUCT OPERATION

The motorcycle mechanism on this product tilts to the left and right during game play.
To avoid injury and trouble, be sure to pay attention to the behavior of visitors and players.

## 3-1 BEFORE OPERATION

## AHARNNG

In order to avoid accidents, check the following before starting the operation:

- To ensure maximum safety for the players and the customers, ensure that where the product is operated has sufficient lighting to allow any warnings to be read. Operation under insufficient lighting can cause bodily contact with each other, hitting accident, and/or trouble between customers.
- Be sure to perform appropriate adjustment of the monitor (projector). For operation of this machine, do not leave monitor's flickering or deviation as is. Failure to observe this can have a bad influence upon the players' or the customers' physical conditions.
- It is suggested to ensure a space allowing the players who feel sick while playing the game to take a rest.
- Check if all of the adjusters the surface. If they are not, move and cause an accid $\epsilon$

## AWARNNG

- Do not put any heavy item on this product. Placing any heavy item on the product can cause a falling down accident or parts damage.
- Do not climb on the product. Climbing on the product can cause falling down accidents. To check the top portion of the product, use a step ladder.
- To avoid electric shock, check to see if door \& cover parts are damaged or omitted.
- To avoid electric shock, short circuit and/or parts damage, do not put the following items on or in the periphery of the product.

Flower vases, flowerpots, cups, water tanks, cosmetics, and receptacles/ containers/vessels containing chemicals and water.

- Check the surrounding area before turning on the power. The product will perform the initializing operation automatically after the power is turned on. If there are people near it, they could be struck or knocked over when the seat moves to the left and right.
- For safety reasons, perform a test run, and be sure to inspect the safety mechanism before making the game available for play. The product is equipped with a safety mechanism as the seat will vibrate (move to the left and right). Be very careful when inspecting the safety mechanism to ensure it works properly.
- Is the seat loose?
- Are the side guide plates undamaged and intact?
- Inspect the seat to make sure it moves properly. Abnormal movement of the seat could lead to accidents, so do not make the game available for play until the problem is resolved.
- Does the seat move in the direction it is steered?
- Does the seat move smoothly?
- Is there significant rattling?
- Are there any unusual noises when the seat moves?
- Does the seat vibrate in an unusual manner when it moves?
- Does the seat stop in a level position when the game ends?
- Stop operations immediately if the moving mechanism ever malfunctions. Turn off the power, unplug the power plug from the outlet, and contact the party listed in this manual or the point of purchase for this product. Continued use despite a malfunction could result in major accidents such as electrocution, short circuits, fire, or a fall.
- If the moving mechanism requires maintenance, contact the party listed in this manual or the point of purchase for this product. If maintenance work is performed by someone other than a qualified technician, an accident involving the person performing the maintenance work or persons playing the game may occur.

## ACAUTON

To avoid injury, be sure to provide sufficient space by considering the potentially crowded situation at the installation location. The motorcycle mechanism on this product tilts to the left and the right according to the player's steering. Insufficient installation space can cause making bodily contact with each other, hitting accidents, and/or trouble between customers.

## 3-2 DURING OPERATION (PAYING ATTENTION TO CUSTOMERS)

To avoid injury and trouble, be sure to pay attention to the behavior of visitors and players

## AHARNNG

- For safety reasons, do not allow any of the following people to play the game.
- Those who need assistance such as the use of an apparatus when walking.
- Those who have high blood pressure or a heart problem.
- Those who have experienced muscle convulsion or loss of consciousness when playing video games, etc.
- Those who have neck or spinal cord problems.
- Those who are intoxicated or under the influence of drugs.
- Pregnant women.
- Persons susceptible to motion sickness.
- Persons who disregard the product's warning displays.
- Persons under 140 cm in height.
- Persons over 150 kg in weight.
- Those who cannot grasp the Control Unit securely because of immobility in fingers, hands or arms.
- For safety reasons, persons under 140 cr in height cannot play this game.

- Instruct players that only 1 person should get on the motorcycle at a time. The product is made for a single rider. If two or more people get on at the same time, they could fall off.

## AHARNNG

- Instruct those wearing high-heeled shoes that they should not play the game due to the high risk of having an accident during play.
- Instruct players to straddle the seat when playing the game. The motorcycle mechanism tilts during play, so the player could fall off if both legs are on one side.
- Even players who have never been adversely affected by light stimulus might experience dizziness or headache depending on their physical condition when playing the game. Small children are especially likely to experience these symptoms. Caution guardians of small children to keep watch on their children during play.
- Instruct those who feel sick during play to have a medical examination.
- To avoid injury from falls and electric shocks due to spilled drinks, instruct the player not to place heavy items or drinks on the product.
- To avoid electric shocks and short circuits, do not allow customers to put hands and fingers or extraneous matter in the openings of the product or small openings in or around the doors.
- To avoid falls and resulting injury, immediately stop the customer from leaning against or climbing on the product, etc.
- To avoid electric shock and short circuit, do not allow customers to unplug the power plug without a justifiable reason.

## $\triangle$ ACAITON

- Covers have been placed over parts on this product that the player could have their fingers or hands caught between, but this does not eliminate the danger to small children. Caution small children not to get close to the product while it is being played.
- Caution players not to take their feet off the footrests during play. If the player takes his or her feet off the footrests carelessly during play, their feet could get caught between or on parts, resulting in broken bones, sprains, or other injuries.
- Do not engage in actions that could result in accidents or trouble such as playing with bags or scarves draped around the neck or while holding drinks.
- Caution those other than the player that they should not go near the cabinet. Doing so could result in collision with the player or the motorcycle mechanism.
- Instruct players to grip the handles tightly during play to prevent accidents. Caution those that engage in risky behavior such as holding on with just one hand.
- Immediately stop such violent acts as hitting and kicking the product. Such violent acts can cause parts damage or cause the cabinet to fall over, resulting in injury.
- The maximum weight for players is 150 kg . Prohibit those who weigh more than 150 kg from playing as it could result in abnormal operation or damage to the parts.

## 4 PART DESCRIPTION

4 FIG. 01

4 Table 01 Major Dimensions and Weights for Reference When Moving the Product

| ITEMS | Width $\times$ Depth $\times$ Height | Weight |
| :--- | :--- | :--- |
| Rear cabinet (without Coin Chute Tower) | $35^{\prime} \times 59^{\prime} \times 51^{\prime}$ | 314 lbs |
|  | $890 \mathrm{~mm} \times 1,493 \mathrm{~mm} \times 1,280 \mathrm{~mm}$ | 142 kg |
| DLP cabinet | $54^{\prime} \times 24^{\prime} \times 74^{\prime}$ | 480 lbs |
|  | $1,360 \mathrm{~mm} \times 610 \mathrm{~mm} \times 1,870 \mathrm{~mm}$ | 218 kg |
| Billboard | $51^{\prime} \times 21^{\prime} \times 13^{\prime}$ | 40 lbs |
|  | $1,270 \mathrm{~mm} \times 520 \mathrm{~mm} \times 320 \mathrm{~mm}$ | 19 kg |

## 5 ACCESORIES

Confirm that the accessories listed in the table below are present when setting up the product. The parts listed as "Spare" in the "Use etc." column are expendable parts, and have therefore been included as spare parts.

## 5 TABLE 01 ACCESORIES

DESCRIPTION: OWNER'S MANUAL
Part No. (Qty.): $\quad 555-30-300(1)$
Note:
This manual
Figures:
Parts not labeled with part numbers are as yet unregistered or cannot be registered. Be sure to handle all parts with care, as some parts are not available for purchase separately.

## DHD SOFT KTT (l)

## 6 ASSEMBLY AND INSTALLATION

## AHAPNNG

－This work should be carried out by the site maintenance personnel or other qualified professionals．Work performed by non－technical personnel can cause a severe accident such as electric shock．Failing to comply with this instruction can cause a severe accident such as electric shock to the player during operation．If no one with proper technological expertise is available，request service from the office indicated in this document or the point of purchase so as to ensure safety．
－Perform assembly work by following the procedure herein stated．Failure to comply with the instructions can cause electric shock．
－Perform assembling as per this manual．Since this is a complex machine， incorrect assembling can cause an electric shock，machine damage and／or improper functioning as per specified performance．
－When assembling，be sure to use plural persons．Depending on the assembly work，there are some cases in which working by one person alone can cause personal injury or parts damage．
－Adhere strictly to all of the work procedures stipulated in this document．If two or more workers are working at the same time，exercise special caution．If sequences are carried out erroneously，accidents can result．There might also be cases in which the assembly cannot be completed．
－Pay special attention to the surroundings when a multiple number of workers are working at the same time．There is always the danger that a worker might be injured．In assembly and installation of this product，there are procedures in which a stepladder is used and procedures in which heavy objects are attached．Carelessness in doing work could lead to grave injuries and even fatalities．
－Ensure that connectors are accurately connected．Incomplete connections can cause electric shock．
－Be careful not to damage the wires．Damaged wires may cause electric shock or short circuit or present a risk of fire．
－Do not leave power cable or earth lines exposed over passageways．Exposure could lead to damage，electric shock or short circuit．Wherever wiring has been laid out on a floor surface，use a wiring protection cover．（Wiring diameter： Power cable，approx．ø8，Network cable，approx．ø5．）
－When inserting or removing a connector，always hold it by its main part．If you hold it by anything else while doing so，the connections between wire and connector terminal fixtures could be damaged；and there could be a short circuit or fire．There could also be poor connectivity．
－Make sure that all the adjusters are resting on the floor．The cabinet may move and cause an accident if the adjusters are not laid out properly．

## ATMPNNG

- Whenever any fasteners (e.g. screws, nuts) have been lost, always use replacement fasteners with proper dimensions as specified in this manual. If fasteners of any other dimensions are used, it could cause damage and/or separation of parts that result in secondary accidents.
- Exercise proper caution when using a step ladder to perform work. Falling or tipping over could result in a major accident. Also, if the ceiling is low, you could bump your head.

## $\triangle$ CAUTON

- To perform work safely and securely, be sure to prepare a step which is in a secure and stable condition. Performing work without using the step can cause accidents such as falling down.
- When attaching or removing doors be careful that your hand or finger does not get caught in anything.
- Support and hold parts in place securely and fasten them with screws and/or bolts. Use two workers, one to support the part and another to fasten it in place. If a part is not supported securely, it might fall down, resulting in an accident.
- Wear appropriate work clothing so that work can be performed safely. Use gloves and safety shoes to prevent accidents or injuries.
- When installing a wire protection cover over a floor, use a material shaped so that no one passing by will stumble over it. Using a material that could be stumbled over might lead to an accidental fall.
- Be careful in handling plastic parts. Be sure not to tighten screws or nuts too tightly. If such parts are exposed to excessive loads or impact, they might become damaged, resulting in fragments or cracks that could cause accidental injury.
- When installing 2 cabinets side by side, leave enough room so that the players will not collide with each other or other customers. If the cabinets are too close together, it could cause collisions. If the player were to fall off, it could result in a serious injury such as the player hitting his or her head on the other machine. It could also provoke unnecessary conflict between customers.

## ST0e) PPORTANT

Be very careful when handling the DLP projector screen. The screen is easily damaged but cannot be repaired. If damaged the entire screen must be replaced.

The installation and assembly work for this product is performed according to the following procedures:

6-1 Attaching the Billboard
6-2 Attaching the Rear Cabinet
6-3 Fastening the Product to the Installation Location
6-4 Attaching the Coin Chute Tower
6-5 Installing the Mat
6-6 Connecting Power and Ground Wire
6-7 Checking the Assembly

## Tools necessary for work

- MASTER KEYS

- Phillips screwdrivers (for M4, M5 screws)

- Hexagonal screwdrivers (for M4 bolts and nuts)

- Socket wrenches (for M6, M8 bolts, nuts)

Wio

- Spanner with measuring distance of 24 mm to opposite side (for adjusters)

- Step/Stepladder

## 6-1 ATTACHING THE BILLBOARD

Use several stepladders to perform the above head work.
. Unscrew 8 billboard screws on bith sides.
Lift the billboard up with at least 1 other person and set it on the DLP projector from back.

Fasten Billboard in place with 4 billboard screws on both sides.

3
Insert billboard pipes into side of billboard. then fasten billboard pipes on both sides, using 4 billboard screws on both sides.

4
Connect $2 \times 2$ pin connectors and $1 \times 3$ pin connector, inside billboard.

5
Place marquee, using 4 x marquee screws..

## 6-2 ATTACHING THE REAR CABINET

1 Connect the 5 connectors on the ASSY tube to the DLP base.

2
Fasten the ASSY tube in place with 6 tr not to pinch any wires.

6-5 FIG. 03

Put the rear cabinet in place.

6-5 FIG. 05

5
Fasten the ASSY tube in place with 4 tr

Imans scren fy. hat
M4제

6-5 FIG. 06

## 6-3 FASTENING THE PRODUCT TO THE INSTALLATION LOCATION

## AWARNNG

Make sure that all the adjusters contact the floor. Otherwise the cabinet could move, causing an accident.

This product has 9 casters and 11 adjusters. After determining the installation location, have the adjusters contact the floor directly, and adjust them so the machine will remain in a level position keeping a space of about 5 mm between the floor and the casters.

NOTE: Put the adjusters on the coin chute tower on the floor after following the instructions in "6-7 Attaching the Coin Chute Tower. "

6-6 FIG. 01

1
Move the product to the installation site. Secure a 150 mm space between the back wall and the back of the cabinet for ventilation.

2
Leave 340 mm of space between the front and rear cabinets.
3
Bring the adjusters into direct contact with the floor. Use a wrench to align the height of the adjusters until the cabinet is perfectly level.

6-6 FIG. 02

Views aremedtera to 1/IDR Ube them for refrence in inctulution site lryart.

6-6 FIG. 03

## 6-4 ATTACHING THE COIN CHUTE TOWER

1
Fasten the hole lid in place with 4 screws. Make sure the rectangular hole on the hole lid is in the position shown in the figure when attaching it.

2
Attach 2 rubber dampers to the cabinet.

3
Insert the tower joints into the rubber dampers and fasten them in place with 2 nuts.

6-7 FIG. 03

## 4

Attach the wire cover.

6-7 FIG. 05

5
Put the ground terminal and connector through the wire cover.

6-7 FIG. 07

7 Connect the connector.

Curnect conneribor. shilip

6-7 FIG. 08

Fasten the duct stay to the wire cover with 2 screws. Attach the duct stay as shown in the figure.

6-7 FIG. 09

Fasten the wire cover in place w pinch any wires.

## BNE CONER

6-7 FIG. 11

Attach and fasten the joint lid in place with 2 truss screws and 2 hexagon bolts.

12 Hold the coin chute tower up with at least 1 other person and attach it after connecting 1 connector.
Be careful not to pinch any wires.

6-7 FIG. 14

13
Unlock the coin chute door with the master key and take out the key inside. Unlock the cash box door with the key and open it.

14 Fasten the coin chute tower in place with 4 hexagon bolts.

6-7 FIG. 16 Inside cash box door

6-7 FIG. 17 DLP projector side

15
Place the coin chute tower's 3 adjusters on the floor. (See "6-6 Fastening the Product to the Installation Location.")

6-7 FIG. 18

NOTE: The coin chute tower is designed to move in each direction even after being attached in order to prevent vibration.

## 6-5 INSTALLING THE MAT

1 Lay the mat down.

6-8 FIG. 01

6-8 FIG. 02 Right side of rear cabinet (rear)

Refer to Step 2 and fasten 2 guides to the left side of the rear cabinet with 2 hexagon bolts in the front and back.

If the floor is bare, adjust the position of the mat and attach the three pieces of double-sided tape on both sides of the mat to stick it to the floor.
If the floor is carpeted, adjust the position of the mat and attach the supplied velcro to the three pieces of double-sided tape attached on both sides of the mat to stick it to the floor.

## 6-6 CONNECTION OF POWER AND GROUND WIRE

## ATMARNG

- Use the power supply equipped with an earth leakage breaker. Use of power supply without such a breaker could result in fire if there is a current leakage.
- Have available a securely grounded indoor ground terminal. Without proper grounding, customers could be electrocuted and product operations might not always be stable.
- Do not expose the power cord or ground wire. If these are exposed, customers could stumble over them, for instance, and easily damage them. Additionally, if these lines are damaged, there could be a risk of electrical shock or short circuit. Set these lines at locations where they will not interfere with customer traffic, or attach covers to them.
- After laying out the power cord on the floor, be sure to always protect it. If the power cord is left exposed, it can easily be damaged, resulting in electrical shock.
- When using the product's AC unit ground terminal, use ground wire with a circular terminal as shown in the illustration, and establish ground securely. Avoid indiscriminant grounding operations such as use of wire with only its sheath peeled off.

## T00) EPORTANT

If grounding has been established with the ground wire inside the power cord, do not perform grounding with the AC unit ground terminal. Conversely, if the AC unit ground terminal has been used for grounding, do not establish ground with the ground wire in the power cord. Otherwise there could be faulty or erroneous operations.

The AC Unit has Main SW, Circuit Protector, Earth Terminal and the Inlet which connects the Power Cord.
1
Ensure that the Main SW is OFF.

Connect one end of the earth wire to the AC earth terminal, and the other end to the indoor earth terminal. The accessory power cord contains earth wire. Connect power cord to AC unit inlet, and then insert power cord plug into "power outlet with earth terminal". If there is no "power outlet with earth terminal", be sure to always establish grounding by some means; for example, by connecting the $A C$ unit earth terminal to the earth system with an earth wire set

6-10 FIG. 02 aside for that purpose. When using a conversion adapter sold on the market to provide power, connect the adaptor's earth wire terminal to an "earth terminal that is securely grounded".

When using an earth wire set aside separately, connect one end of the earth wire to AC unit earth terminal and the opposite end to indoor earth terminal. The AC unit earth terminal uses a bolt and nut combination. Remove the nut, pass the earth terminal through the bolt, and then tighten the nut.

6-10 FIG. 03 <For Taiwan>

Lay out power cord indoors. Attach power cord cover to protect the cord. If grounding is established by using an earth wire set aside separately, lay out this earth wire and protect it at the same time.

6-10 FIG. 04

## 6-7 CHECKING THE ASSEMBLY

Refer to Chapter 9 "Explanation of Test and Data Display" and enter Test Mode.
Use Test Mode to check whether or not the product has been assembled correctly and whether or not everything is normal with the LINDBERGH RED EX, connected boards, and input/output devices.

## (1) MONITOR TEST

A screen for testing the monitor is displayed when MONITOR TEST is selected on the System Test Menu Screen in System Test Mode. The monitor is adjusted before it is shipped from the factory, but look at the test screen to see if further adjustment is necessary. If further adjustment is necessary, refer to Chapter 13 and adjust the monitor.

## (2) SPEAKER TEST

A screen for testing the speakers is displayed when SPEAKER TEST (PCI) is selected on the System Test Menu Screen in System Test Mode. A sound test can be performed by turning the RIGHT SPEAKER or LEFT SPEAKER "ON" and "OFF."

## (3) INPUT TEST

A screen for testing the switches is displayed when INPUT TEST is selected on the GAME TEST MODE Screen in Game Test Mode.
Refer to "9-3-2 INPUT TEST" and check to make sure it works correctly.

6-12 FIG. 04 INPUT TEST SCREEN

## (4) OUTPUT TEST

A screen for testing the lamp and wire connections is displayed when OUTPUT TEST is selected on the GAME TEST MODE Screen in Game Test Mode. Refer to "9-3-3 OUTPUT TEST" and check to make sure the lamps light up properly and that the motorcycle mechanism is working correctly.

| OUTPUT TEST |  |
| :---: | :---: |
| START LAMP | OFF |
| LEFT LEADER LAMP | OFF |
| RIGHT LEADER LAMP | OFF |
| FOOT LAMP | OFF |
| TAIL LAMP | OFF |
| LEAN ENABLE | OFF |
| LEAN LEFT | OFF |
| LEAN RIGHT | OFF |
| LEAN CENTER | OFF |
| VIBRATION ENABLE | OFF |
| VIBRATION | OFF |
| -> EXIT |  |
| SELECT WITH SERVICE AND PRESS TEST |  |
|  |  |

6-12 FIG. 05 OUTPUT TEST SCREEN

## (5) INPUT ADJUSTMENT

A screen for adjusting the controller is displayed when INPUT ADJUSTMENT is selected on the GAME TEST MODE Screen in Game Test Mode. Before making the game available for play, always test the game and check to make sure no adjustments are necessary and that it is functioning correctly. (See 9-3-5.)

| INPUT ADJUSTMENT |  |
| :---: | :---: |
| HANDLE | MIN NOW MAX $\left[{ }^{* *} \mathrm{H}\right] \quad\left[{ }^{* *} \mathrm{H}\right] \quad\left[{ }^{* *} \mathrm{H}\right]$ |
|  | Left [C  <br> 0 ] Right |
| ACCEL |  |
| BRAKE |  |
|  | Min [0 ] Max |
| DEFAULT SETTING |  |
| EXIT : MEMORIZE <br> -> EXIT : CANCEL |  |
| SELECT WITH SERVICE AND PRESS TEST |  |

6-12 FIG. 06 INPUT ADJUSTMENT SCREEN

## 7 PRECAUTIONS WHEN MOVING THE MACHINE

## AHARNNG

- When moving the machine, be sure to pull out the plug from the power supply. Moving the machine with the plug still inserted can cause the power cord to be damaged, resulting in a fire and/or electric shock.
- When moving the machine on the floor, retract the adjusters, and ensure that the casters make contact with the floor. Pay careful attention so that the casters do not run over power cords and earth wires. Damaging the power cords can cause an electric shock and/or short circuit.
- When lifting the cabinet, be sure to hold the handles and the bottom part. Lifting the cabinet by holding other portions may damage parts and installation portions due to the empty weight of the cabinet, and may cause personal injury.
- When moving the DLP projector, do not push it from the rear side. Push it from sideways. Pushing the DLP projector from the rear side can have the DLP projector fall down, causing personal injury, etc. In case the floor has slanted surfaces or step-like differences, be sure to move the machine by 2 or more persons.

## ACAUTION

Do not hold or press the plastic parts when moving the machine. Failure to observe this instruction may break the parts, and eventually the broken pieces may cause a personal injury.

## 170 <br> CPORTANT

- Disassemble the product into the individual units before moving it. If the product is tilted or the cabinet is set on an uneven surface in an assembled state, the joints could break.
- Do not allow ropes to come in contact with the surface of the machine directly or they may scratch it. Put some kind of protective material under the rope where it will touch the machine.

7 FIG. 01
Remove the mat and DVD DRIVE when moving the product and separate the rear cabinet. (See Chapter 6.) If there is a difference in floor level of 1 cm or more, add a ramp or separate the coin chute tower as well.

7 FIG. 02

The product can be moved with the coin chute tower attached, but do not pull or push on it in order to move the cabinet.

## 8 GAME DESCRIPTION

## 8-1 HOW TO PLAY

1
When you insert coins, they will be counted in the credit display at the bottom of the screen. When you insert enough coins for a game, the message at the bottom will change from "INSERT COIN (S)" to "PRESS START BUTTON," and the START button will flash.
Up to 24 credits can be counted at once. Coins inserted after 24 credits are recorded will not be counted or returned. However, the number of coins inserted will be counted in the data display and the coin meter.
NOTE: The credit and coin settings can be configured under COIN ASSIGNMENTS in System Test Mode. (See 9-2.)

## 2

Once you press the START button when the START button is flashing, the game will begin.

The modes that can be played after the game starts differ depending on whether or not it has been configured for network play. (See Chapter 18 "Network Play.")

- Not configured for network play: Single-player Story Mode (see 8-2) only.
- Configured for network play: Select between Single-player Story Mode and Multiple-player Versus Mode (see 8-3).

8-1 FIG. 01 Button Positions

## 8-2 STORY MODE

In story mode, you play against distinctive rivals that appear during the rounds. If you cross the finish line before your rival within the allotted time, you will be able to proceed to the next round. If you are unable to cross the finish line first or within the allotted time, you can proceed to the next round by continuing. In the final round, you will compete against the "Reigning King," the ultimate rival. If you beat him, you will become the new "Reigning King" and your name will be displayed during the advertisements.
NOTE: If the game is not configured for network play, Story Mode will begin after the game starts.
If the game is configured for network play and there are no entries from the other cabinets, you will be able to play in Story Mode after the game starts.

1
You will be taken to the Motorcycle Selection Screen.
Select 1 motorcycle from the many available. Each motorcycle has its own features, so select one that suits you.

After selecting your motorcycle, you will be taken to the Music Selection Screen.
Select 1 song from the many available. The selected song will be played during the game to enliven the mood. The song can also be changed during the game by pressing the Music Select Button.

After selecting music, several cut scenes will follow and you will be taken to the Game Play Screen. In Story Mode, you will be able to proceed to the next round if you overtake your rival and cross the finish line first.

The player can perform the following operations during the game:

## How to Operate the Motorcycle

## Twist the accelerator:

The motorcycle will speed up in proportion to how far the accelerator on the right side of the handle is twisted.

## Twist the accelerator twice rapidly:

If the acceleration gauge has filled and the accelerator is twisted twice rapidly, the motorcycle's accelerating power will increase in proportion to how full the gauge is, and it will speed up. Also, if the acceleration gauge is completely full when the accelerator is twisted twice rapidly, the motorcycle's accelerating power will increase even more than normal and can be used for an extended period of time. Additionally, the acceleration gauge will fill up as items are collected.

## Tilt the handle:

The motorcycle will turn in the direction the handles are tilted.

## Pull the brake lever:

The motorcycle will slow down in proportion to how hard the brake lever on the right side of the handle is pulled.

## Push the up/down shift buttons:

If the shift buttons on the left side of the handle are pressed, the motorcycle will switch from automatic to manual, and the gears can be shifted up and down by pressing the up and down shift buttons, respectively. If the buttons are not pressed for a certain period of time, it will automatically switch to automatic.

## How to Perform Other Operations

## MUSIC SELECT BUTTON:

The current song can be changed by pressing the Music Select Button. Press it to select another song from the many available.

## VIEW CHANGE BUTTON:

Switch between 3 different views.

If you were unable to cross the finish line within the allotted time or could not overtake your rival, the Continue Screen will appear after the round ends.
If you wish to CONTINUE, insert the required number of coins and press the START button again. If there are enough credits remaining to CONTINUE, you can join again by pressing the START button.

8-2 FIG. 04 Continue Screen

If you choose to continue, game play will resume on the next round after you select a motorcycle and music.
If you continue on the final round, game play will resume on the final round again.
6
If you proceed to the next round, you will be taken to the Course Selection Screen to select the next course.
If you are on either the first or the final round, however, you will not be able to select a course.

Select the course you wish to compete in from the 2 available and proceed to the next round.

## 8-3 VERSUS MODE

Versus Mode is played with multiple players over several rounds and points are received according to ranking. The player with the most points at the end of the final round becomes the new "Reigning King" and can have his or her name displayed during the advertisements.

NOTE: If network play is configured, the game will wait for other players to join after starting and will accept entries from the other cabinets. However, when games are already in progress on the other cabinets or at other times when entries cannot be accepted, the game will automatically proceed to Story Mode without waiting.

8-3 FIG. 01 Entry Waiting Screen

1
If other players join on the Entry Waiting Screen, Versus Mode will begin.
If no other players join within the allotted time, the game will automatically proceed to Story Mode.
2
You will be taken to the Motorcycle Selection Screen.
Select 1 motorcycle from the many available. Each motorcycle has its own features, so select one that suits you.

3
After selecting your motorcycle, you will be taken to the Music Selection Screen.
Select 1 song from the many available. The selected song will be played during the game to enliven the mood. The song can also be changed during the game by pressing the Music Select Button.

After selecting music, you will be taken to the Course Selection Screen.
Select the course you wish to compete in from the 2 available. In Versus Mode, course confirmation is decided by the most votes. If 2 courses have the same number of votes, then the course with the lowest difficulty rating will be chosen.

After selecting the course, several cut scenes will follow and you will be taken to the Game Play Screen. In Versus Mode, the players compete 1 round at a time, and the winner is determined by who has the most points after the final round.

See Step 3 under "8-2 Story Mode" for details on the operations available during game play.

In Versus Mode, you will be taken to the Continue Screen after the round ends.
If you wish to CONTINUE, insert the required number of coins and press the START button again. If there are enough credits remaining to CONTINUE, you can join again by pressing the START button.
NOTE: In Game Test Mode, the settings can be changed so that the player coming in 1st can proceed to the next round. (See 9-3-4.)

8-3 FIG. 04 Continue Screen

When a game is continued and other players have joined, game play will resume on the next round after the players have selected their motorcycles and music. If no other players have joined, the game will proceed to Story Mode.

Points are received according to ranking. The player with the most points at the end of the final round will be able to enter his or her name on the Name Entry Screen, and have it displayed during the advertisements as the "Reigning King."
NOTE: The "Current King" is the player most recently registered as a "Reigning King," regardless of whether the game was in Story Mode or Versus Mode.

## 8-4 HINTS FOR PLAYING THE GAME

- Find a motorcycle that matches your playing style.

Each motorcycle has its own unique features. There are fast types, cornering types, strong types, balance types, and others. Assess the features of the motorcycles, find the one that matches your playing style, and learn how to ride it proficiently.

- Find your best course.

The courses have various shapes and gimmicks. Find the best and worst courses for your motorcycle and select the ones that match your playing style.

- Slow down early when approaching sharp curves.

There are some curves in the courses that cannot be cornered at top speed. Try to slow down before the curves and corner them smoothly, rather than running into obstacles and losing time. This is the key to playing better.

- Fill your acceleration gauge by collecting items.

There are several items along the courses that will fill your acceleration gauge. Collect as many as you can so
that you will have Super Acceleration ready to use whenever you need it.

- Use Super Acceleration effectively.

Super Acceleration can be used for as long as your acceleration gauge is filled. Assess the shape of the course you are on and think about the best time to use it. For example, it would be effective to use it on long straight aways when your gauge is sufficiently filled.

## Items

Acceleration gauge increases by 1 .

## 8-4 FIG. 01

Acceleration gauge increases by 5 .

Acceleration gauge increases to the MAX.

## 8-4 FIG. 02

8-4 FIG. 03

## 9 EXPLANATION OF TEST AND DATA DISPLAY

## AHAPNNG

Do not touch any parts that are not specified in these directions. Touching unspecified locations may lead to electric shock or cause short circuits.

## ACAUTON

- Be careful that a finger or hand does not get caught when opening/closing the coin chute door.
- When you enter Test Mode, the locks on the handles and motorcycle mechanism will release. If you press the TEST Button while leaning on the motorcycle mechanism which tilts, you could fall off. The locks will be activated again when you exit Test Mode.

## ST00) DPORTANT

- When you enter the Test Mode, fractional coin and bonus adder data is erased.
- Adjust the sound to the optimum volume, taking into consideration the environmental requirements of the installation location.
- Removing the coin meter circuitry renders the game inoperable.
- If multiple game machines are connected for network play and you enter Test Mode on one of them, all the others will produce an error. Therefore, do not use Test Mode if people are playing on the other game machines.

This product uses a LINDBERGH RED EX game board and a DVD DRIVE. In the system, a different game can be played by putting a different DVD ROM in the DVD DRIVE.
For this reason, the product's Test Mode consists of two modes: a System Test Mode for systems in which coin settings, for instance, are made for products that use the same system, and a Game Test Mode for setting of difficulty level, etc., and for input/output test of operational units used exclusively with this product.

Perform tests and data checks periodically by manipulating the TEST Button and SERVICE Button in the cabinet. Follow the instructions in this chapter to conduct checks when the game machine is first installed, when money is being collected, or when the game machine does not operate properly.

Shown below are the tests and screens to be used for different problems.
NOTE: "S/M" in the table denotes LINDBERGH RED EX Service Manual, which is provided with the product.

| ITEMS | DESCRIPTION | REFERENCE SECTIONS |
| :---: | :---: | :---: |
| Game machine installation | 1. Investigate each input device on the Input Test Screen. | 6-12, 9-3-2 |
|  | 2. Investigate each output device on the Output Test Screen. | 6-12, 9-3-3 |
|  | 3. Adjust the controllers on the Input Adjustment Screen. | 9-3-5 |
| Periodic maintenance | 1. Check settings. | 9-3-4 |
|  | 2. Test each input device on the Input Test Screen. | 9-3-2 |
|  | 3. Test each output device on the Output Test Screen. | 9-3-3 |
| Control problem | 1. Investigate each input device on the Input Test Screen. | 9-3-2 |
|  | 2. Adjust or replace each input device. | 9-3-5, Chapters 10 \& 11 |
| Monitor problem | On the Monitor Adjustment Check Screen, check to be sure the monitor has been adjusted properly. | Chapter 13, "S/M" Chapter 4 |
| IC board problem | 1. Information Display Screen. | "S/M" Chapter 4 |
|  | 2. Speaker Test. | "S/M" Chapter 4 |
| Date check | Check data on game play times, histograms, etc., and adjust the level of difficulty. | 9-3-4, 9-3-8 |

## 9-1 SWITCH UNIT AND COIN METER

In Test Mode, the switch unit in the coin chute door is operated.
Use the master key, unlock and open the coin chute door. Inside is a switch unit.

TEST Button Establishes Test Mode. Becomes the button to confirm selections in Test Mode.
SERVICE Button
Makes it possible to enter credits for service without increasing the coin meter. Becomes the button to select items in Test Mode.

Sound Volume Knob This is the volume knob for speakers at the left and right of the front panel. Turn the knob to the right to increase speaker volume.

## Coin Meter

After using a key to unlock the cashbox door, the coin meter can be found at the bottom of the cashbox.

9-1 FIG. 03

## 9-2 SYSTEM TEST MODE

## 9708 CPOPTANT

- Read the LINDBERGH RED EX Service Manual that comes with the product for details on the System Test Mode. However, you should perform the settings for this product according to the manual you are reading.
- The details of changes to Test Mode settings are saved when you exit from Test Mode by selecting EXIT from the system Test Mode menu. Be careful because if the power is turned off before that point, changes to the settings will be lost.

In the System Test Mode, the main activities include checking LINDBERGH RED EX information and actions and the setting of coin/credit. Also, a screen appears for checking screen adjustments. For details, see the LINDBERGH RED EX Service Manual, which is provided with the product.

Use the following settings with this product.
If the settings are not as specified, error messages might appear and operations might not be normal.

| COIN ASSIGNMENTS |  |
| :--- | :--- |
| COIN CHUTE TYPE | COMMON |
| SERVICE TYPE | COMMON |

| NETWORK SETTING |  |
| :--- | :--- |
| MAIN NETWORK |  |
| DHCP | DISABLE |

NOTE: Settings other than DHCP do not need to be configured.

## Replacing the Denomination Sheet

If the COIN ASSIGNMENTS settings were changed in System Test Mode, replace the denomination sheet.
1 Turn the power off.

2
Remove the 4 hexagon socket screws and take the instruction plate off.

9-2 FIG. 01

ESIRIKETION PLAEE

9-2FIG. 02

Swap and affix the denomination sheets.

5 FIG. 03

## 9-3 GAME TEST MODE

When the TEST Button is pressed, the System Test Menu Screen (SYSTEM TEST MENU) appears. Use the SERVICE Button to move the cursor to the desired test item. Select GAME TEST MODE and press the TEST Button to display the Game Test Mode Screen.

To change settings in the Game Test Mode, simply making changes on the setting screen will not be effective. Complete the Test Mode in normal fashion.

## 9-3-1 GAME TEST MODE

9-3-1 FIG. 01 GAME TEST MODE Screen

## Operating Instructions

- Use the SERVICE Button to move the cursor to the desired test item.
- Press the TEST Button to select the test item.
- On the GAME TEST MODE screen, select EXIT and press the TEST Button. The SYSTEM TEST MENU screen reappears.

## Explanation of Each Item

| INPUT TEST | Tests each input device used for game. |
| :--- | :--- |
| OUTPUT TEST | Tests each output device used for game. |
| GAME ASSIGNMENTS | Adjusts all game settings. |
| INPUT ADJUSTMENT | Adjusts the Controller. |
| NETWORK SETTING | Adjusts all network settings. |
| BOOKKEEPING | Displays all recorded game data. |
| BACKUP DATA CLEAR | Erases all types of game records. |

## 9-3-2 INPUT TEST

Select INPUT TEST to display the following screen and check the status of input devices.
This test should be used periodically to check that each input device is functioning correctly.

Select INPUT TEST on the GAME TEST MODE Screen and press the TEST Button. A screen will be displayed asking whether or not to initialize the cabinet.

NOTE: If the LEAN option is set to OFF on the GAME ASSIGNMENTS Screen, the INPUT TEST Screen will appear without displaying the Initialize Screen. (See 9-3-4.)

9-3-2 FIG. 01 Initialize Screen

NOTE: The following caution message will be displayed while the cabinet is being initialized:

The seat is being initialized.
For your own safety, please do not touch the seat.

## Operating Instructions

Press the SERVICE Button to start initializing the cabinet. When initialization is complete, it will proceed to the INPUT TEST Screen.
Press the TEST Button to return to the GAME TEST MODE Screen.

NOTE: With this game, if the motor or other parts malfunction during the initialization process, the initialization process will be terminated and it will return to the INPUT TEST Screen. If that happens, an error message will be displayed at the bottom of the screen according to the particular problem.
The error message will be displayed not only during the initialization process, but also when there is a problem during the INPUT TEST. Refer to "9-4 Error Messages" to address the problem.

9-3-2 FIG. 02 INPUT TEST Screen (When an error is displayed)

9-3-2 FIG. 03 INPUT TEST Screen

## Operating Instructions

When the buttons are pressed, the message should switch from OFF to ON or the numbers should change.

Explanation of Each Item

| START | START button |
| :--- | :--- |
| SHIFT UP | SHIFT UP button on left side of HANDLE |
| SHIFT DOWN | SHIFT DOWN button on left side of HANDLE |
| VIEW CHANGE | VIEW CHANGE button |
| MUSIC SELECT | MUSIC SELECT button |
| ACCEL | Numbers will change when the ACCELERATOR is twisted. |
| BRAKE | Numbers will change when the BRAKE is pulled. |
| HANDLE | Numbers will change when the HANDLE is tilted to the left or right. |
| LEAN | Numbers will change when the MOTORCYCLE MECHANISM is tilted to the left or <br> right. <br> NOTE: If the LEAN option on the GAME ASSIGNMENTS Screen is set to OFF, it will <br> be grayed out and the test will not be available. (See 9-3-4.) |
| SERVICE | SERVICE Button |
| TEST | TEST Button |

9-3-2 FIG. 04

Press the SERVICE and TEST Buttons simultaneously to return to the GAME TEST MODE screen.

## 9-3-3 OUTPUT TEST

Perform the output tests for the functions used in the game.
Use this screen periodically to check and make sure the output devices are working properly.

Select OUTPUT TEST on the GAME TEST MODE Screen and press the TEST Button. A screen will be displayed asking whether or not to initialize the cabinet.

NOTE: If the LEAN option is set to OFF on the GAME ASSIGNMENTS Screen, the INPU TEST Screen will appear without displaying the Initialize Screen. (See 9-3-4.)

## 9-3-3 FIG. 01 INITIALIZE Screen

NOTE: The following caution message will be displayed while the cabinet is being initialized:

The seat is being initialized.
For your own safety, please do not touch the seat.

## Operating Instructions

Press the SERVICE Button to start initializing the cabinet. When initialization is complete, it will proceed to the OUTPUT TEST Screen.
Press the TEST Button to return to the GAME TEST MODE Screen.

NOTE: With this game, if the motor or other parts malfunction during the initialization process, the initialization process will be terminated and it will return to the OUPUT TEST Screen. If that happens, an error message will be displayed at the bottom of the screen according to the particular problem.
The error message will be displayed not only during the initialization process, but also when there is a problem during the OUTPUT TEST. Refer to "9-4 Error Messages" to address the problem.

9-3-3 FIG. 03 OUTPUT TEST Screen

## Explanation of Each Item

| START LAMP | Select START LAMP and press the TEST Button to change it to ON. The Start <br> Button on the cabinet will light up. Press the TEST Button again to change it to <br> OFF. |
| :--- | :--- |
| LEFT LEADER LAMP | Select LEFT LEADER LAMP and press the TEST Button to change it to ON. <br> The upper left lamp on the DLP projector will light up. Press the TEST Button <br> again to change it to OFF. |
| RIGHT LEADER LAMP | Select RIGHT LEADER LAMP and press the TEST Button to change it to ON. <br> The upper right lamp on the DLP projector will light up. Press the TEST Button <br> again to change it to OFF. |
| FOOT LAMP | Select FOOT LAMP and press the TEST Button to change it to ON. The lamps <br> on the left and right steps on the cabinet will light up. Press the TEST Button <br> again to change it to OFF. |
| TAIL LAMP | Select TAIL LAMP and press the TEST Button to change it to ON. The lamp on <br> the back of the cabinet will light up. Press the TEST Button again to change it to <br> OFF. |
| LEAN ENABLE | Select LEAN ENABLE and press the TEST Button to change it to ON. The lock <br> on the motorcycle mechanism will be released. Press the TEST Button again to <br> change it to OFF. <br> The lock on the motorcycle mechanism will be activated. Also, when the LEAN <br> ENABLE option is set to OFF, selecting LEAN LEFT, LEAN RIGHT, or LEAN <br> CENTER and pressing the TEST Button will change it to ON. |
| LEAN RIGHT | Select LEAN LEFT and press the TEST Button to change it to ON. The <br> motorcycle mechanism will tilt to the left. If the TEST Button is pressed again <br> or the LEAN ENABLE, LEAN RIGHT, or LEAN CENTER options are set to <br> ON and the motorcycle mechanism finishes tilting to the left, it will change to <br> OFF. |
| Select LEAN RIGHT and press the TEST Button to change it to ON. The <br> motorcycle mechanism will tilt to the right. If the TEST Button is pressed again <br> or the LEAN ENABLE, LEAN LEFT, or LEAN CENTER options are set to ON <br> and the motorcycle mechanism finishes tilting to the right, it will change to OFF. |  |

| LEAN CENTER | Select LEAN CENTER and press the TEST Button to change it to ON. The <br> motorcycle mechanism will return to its upright position. If the TEST Button is <br> pressed again or the LEAN ENABLE, LEAN LEFT, or LEAN RIGHT options <br> are set to ON and the motorcycle mechanism finishes returning to its upright <br> position, it will change to OFF. |
| :--- | :--- |
| VIBRATION ENABLE | Select VIBRATION ENABLE and press the TEST Button to change it to ON. <br> The motorcycle mechanism's motor lock will be released. Press the TEST <br> Button again to change it to OFF. The motor lock will be activated. |
| VIBRATION | Select VIBRATION and press the TEST Button to change the setting to a <br> number between 1 and 15. Each number corresponds to the level of motor <br> vibration. The higher the number, the stronger the vibration. Press the TEST <br> Button again to change it to OFF. Also, if you select VIBRATION and press the <br> TEST Button when the VIBRATION ENABLE option is set to OFF, the number <br> will be displayed and the VIBRATION ENABLE option will change to ON at <br> the same time. |

NOTE: If the LEAN option on the GAME ASSIGNMENTS Screen is set to OFF, the LEAN ENABLE, LEAN LEFT, LEAN RIGHT, and LEAN CENTER options will be grayed out and the test will not be available. (See 9-3-4.) If the VIBRATION option on the GAME ASSIGNMENTS Screen is set to OFF, the VIBRATION ENABLE and VIBRATION options will be grayed out and the test will not be available. (See 9-3-4.)

9-3-3 FIG. 04

Move the cursor to EXIT and press the TEST Button to return to the GAME TEST MODE screen.

## 9-3-4 GAME ASSIGNMENTS

Changes to settings are not enabled until Game Test Mode is exited. After changing settings, be sure to exit Game Test Mode.

## Explanation of Each Item

| CABINET TYPE | Set the cabinet type DELUXE or STANDARD. <br> NOTE: Set the DELUXE in this game machine. |
| :--- | :--- |
| LEAN | If the cabinet lean option is set to ON, it will move. If it is set to OFF, it will <br> not move. <br> NOTE: If CABINET TYPE is not set to DELUXE, it will be grayed out and <br> will not be available. |
| VIBRATION | If the cabinet motor vibration option is set to ON, it will vibrate. If it is set to <br> OFF, it will not vibrate. <br> NOTE: If CABINET TYPE is not set to DELUXE, it will be grayed out and <br> will not be available. |
| ADVERTISE SOUND | Set the sound for the advertisements. There are five levels: ON $\rightarrow 3 / 4 \rightarrow 1 / 2$ <br> $\rightarrow 1 / 4 \rightarrow$ OFF. The volume gets lower the closer it gets to OFF. |
| ADVERTISE VIBRATION | Set the motor vibration during advertisements. If it is set to ON, it will <br> vibrate during the advertisements. If it is set to OFF, it will not vibrate. If <br> VIBRATION is set to OFF, this option will be grayed out and will not be <br> available. |
| GAME DIFFICULTY $>$ | Select from 5 levels of difficulty for Story Mode: VERY EASY $\rightarrow$ EASY $\rightarrow$ <br> NORMAL $\rightarrow$ HARD $\rightarrow$ VERY HARD. The level of difficulty increases the <br> closer it gets to VERY HARD. |
| GAME DIFFICULTY $>$ | Select from 5 levels of difficulty for Versus Mode: VERY EASY $\rightarrow$ EASY <br> $\rightarrow$ NORMAL $\rightarrow$ HARD $\rightarrow$ VERY HARD. The level of difficulty increases <br> Ver closer it gets to VERY HARD. |

| VERSUS MODE 1st <br> CONTINUE | Set whether or not to allow the player coming in 1st to proceed to the next <br> round in Versus Mode. If the option is set to OFF, all players' game will end <br> on that round (Continue Screen will be displayed). |
| :--- | :--- |
| DRESS CODE | Set the amount of clothing that the female characters in the game wear to <br> LOW or HIGH. The clothing is normal at the LOW setting, and at HIGH it <br> will cover more skin. |
| SPEED DISPLAY | Set the speedometer to display speed in KM (kirometers per hour; km/h) or <br> MILE (miles per hour; MPH). (Default setting: KM) |

NOTE: If STAND ALONE or SUB is selected for the MODE option on the NETWORK SETTING Screen, the options that cannot be selected under GAME ASSIGNMENTS will be grayed out and will not be available.

| GAME ASSIGNMENTS |  |

9-3-4 FIG. 02 GAME ASSIGNMENTS Screen (SUB)

Move the cursor to EXIT and press the TEST Button to return to the GAME TEST MODE screen.

## 9-3-5 INPUT ADJUSTMENT

When adjusting the HANDLE, ACCELERATOR, and BRAKE settings, it is not necessary to tilt the HANDLE, twist the ACCELERATOR, or pull the BRAKE all the way to their limits. If excessive force is applied, it could end up breaking them or causing problems during the game so be careful.

Adjust the controllers used in the game:

9-3-5 FIG. 01 INPUT ADJUSTMENT

## Explanation of Each Item

| HANDLE | This option sets the left-right offset for the handle. Tilt the handle all the way to the <br> left and right and return it to the center position. <br> NOTE: "c" indicates the center position set for the handle. |
| :--- | :--- |
| ACCEL | This option sets the offset for when the accelerator is twisted. Twist the accelerator <br> all the way and return it to the starting position. |
| BRAKE | This option sets the offset for when the brake lever is pulled. Pull the brake lever all <br> the way and return it to the starting position. |
| DEFAULT SETTING | This option returns the settings to the default values. |

Select "EXIT: MEMORIZE" and press the TEST Button to save the settings and return to the GAME TEST MODE Screen.

Select "EXIT: CANCEL" and press the TEST Button to return to the GAME TEST MODE Screen without saving the settings.

## 9-3-6 NETWORK SETTING

Configure the network settings for the cabinets.

CABINET ID
MODE
TOTAL NUMBER

1

STAND ALONE
-> EXIT

SELECT WITH SERVICE AND PRESS TEST

## 9-3-6 FIG. 01 NETWORK SETTING Screen

## Explanation of Each Item

| CABINET ID | Assign a number between 1 and 4 to the cabinets, and set the numbers to be identified during communication. If network play will be used, set a different number on each cabinet in the network. It is recommended that you assign the numbers in numerical order from left to right (facing the machines) in order to match them with the results displayed during versus play. <br> NOTE: With this game, if the same number is assigned as the CABINET ID for different cabinets in the network, it will give an error when proceeding to the Game Screen and "Error6803" will be displayed on the screen. If that happens, press the TEST Button again and go to SYSTEM TEST MENU $\rightarrow$ GAME TESTMODE $\rightarrow$ NETWORK SETTING to change the CABINET IDs to different numbers. |
| :---: | :---: |
| MODE | Set the MODE of the cabinet. Choose from STAND ALONE, MAIN, and SUB. STAND ALONE is a setting for when network play will not be used. MAIN is for network play and should be assigned to one of the cabinets. SUB is also for network play and should be assigned to all other cabinets other than the one set as the MAIN cabinet. <br> NOTES: <br> - With this game, if more than one cabinet in the network is set to MAIN, it will give an error when proceeding to the Game Screen and "Error6802" will be displayed on the screen. If that happens, press the TEST Button again and go to SYSTEM TEST MENU $\rightarrow$ GAME TEST MODE $\rightarrow$ NETWORK SETTING to change the MODE settings so that only one cabinet is set to MAIN. <br> - With this game, if all the cabinets in the network are set to SUB, it will give an error when proceeding to the Game Screen and "Error6804" will be displayed on the screen. If that happens, press the TEST Button again and go to SYSTEM TEST $M E N U \rightarrow$ GAME TEST MODE $\rightarrow$ NETWORK SETTING to change the MODE settings so that one of the cabinets is set to MAIN. |

| TOTAL NUMBER | If the MODE of the cabinet is set to MAIN, set the number of cabinets in the network <br> under TOTAL NUMBER. The number should be equal to the total number of cabinets <br> set to MAIN and SUB. If the MODE of the cabinet is set to something other than <br> MAIN, the TOTAL NUMBER option will be grayed out and will not be available. <br> NOTE: With this game, if the TOTAL NUMBER setting does not match the total <br> number of cabinets in the network set to MAIN and SUB, it will give an <br> error when proceeding to the Game Screen and "Error6804," "Error6006," <br> "Error6008," or "Error6009" will be displayed on the screen. If that happens, <br> press the TEST Button again and go to SYSTEM TEST MENU $\rightarrow$ GAME TEST <br> MODE $\rightarrow$ NETWORK SETTING to change the TOTAL NUMBER setting to the <br> total number of cabinets that have been set to MAIN and SUB. |
| :---: | :--- |

Move the cursor to EXIT and press the TEST Button to return to the GAME TEST MODE screen.

## 9-3-7 BOOKKEEPING

The game records can be viewed here.

| BOOKKEEPING | PAGE 1/7 |

This is a list of the total play times in Versus Mode.
This displays play times on a scale from 0 M 00 S to 9 M 59 S based on 30 -second intervals.
All play times 10 minutes or over are included in the item OVER 10M00S.

Press the TEST Button to return to the GAME TEST MODE Screen.

## 9-3-8 BACKUP DATA CLEAR

This deletes the various game data (ranking data, BOOKKEEPING data from GAME TEST MODE, and remaining credits).

## BACKUP DATA CLEAR

YES(CLEAR)
-> NO (CANCEL)

SELECT WITH SERVICE AND PRESS TEST

9-3-8 FIG. 01

## Explanation of Each Item

| YES (CLEAR) | All game records are cleared. After clearing, "COMPLETED" is displayed and press the <br> TEST Button to return to the GAME TEST MODE screen. |
| :--- | :--- |
| NO (CANCEL) | Move the cursor and press the TEST Button to return to the GAME TEST MODE screen <br> without clearing the data. |

## 9-4 ERROR MESSAGES

## AWARNNG

- Should an error message appear, have the facility's maintenance or technical staff deal with the issue. Work by those without the necessary specialized knowledge and technical expertise can result in electric shocks, short circuits, and fires. If such maintenance or technical staff is not available, or if the problem is with the ride mechanisms, immediately turn off the product's power and contact the office listed in this manual or the point of purchase.
- In the event that problems arise beyond those covered in this manual, or if the procedures listed in this document do not solve the problem, do not attempt to solve the problem with careless measures. Immediately turn off the product' s power and contact the office listed in this manual or the point of purchase. Improper procedures can result in unforeseen accidents.

If an error number or message not listed below is displayed, stop use of the machine and send the LINDBERGH RED EX in for repairs.

This product displays the following messages when it detects an error. Read the error description and follow the steps indicated. Refer to the LINDBERGH Service Manual for details on error messages displayed with the LINDBERGH logo.

## NETWORK MESSAGES

| DISPLAY | Error6003 <br> Network PacketSize. |
| :--- | :--- |
| CAUSE | The size of the packets transmitted was abnormal during communication. |
| COUNTERMEASURES | Check to make sure the network cable has been inserted all the way. |

| DISPLAY | Error6004 <br> Network PacketKind. |
| :--- | :--- |
| CAUSE | The kind of packets transmitted during communication was abnormal. |
| COUNTERMEASURES | Check to make sure the network cable has been inserted all the way. |

| DISPLAY | Error6005 <br> Network TimeOut. |
| :--- | :--- |
| CAUSE | Communication was interrupted for a certain length of time due to a problem <br> between the cabinets, the network line being pulled out, etc. |
| COUNTERMEASURES | Check to make sure the cabinets are on and the network cable has been inserted <br> all the way. |

| DISPLAY | Error6006 <br> Network SendError. |
| :--- | :--- |
| CAUSE | Sending failed for some reason. |
| COUNTERMEASURES | Check to make sure the network cable has been inserted all the way. |

| DISPLAY | Error6007 <br> Network SendTryOut. |
| :--- | :--- |
| CAUSE | Sending failed repeatedly for some reason. |
| COUNTERMEASURES | Check to make sure the network cable has been inserted all the way. |

| DISPLAY | Error6008 <br> Network RecvError. |
| :--- | :--- |
| CAUSE | An unknown error occurred while receiving data. |
| COUNTERMEASURES | Check to make sure the network cable has been inserted all the way. |

| DISPLAY | Error6009 <br> Network RecvDisconnect. |
| :--- | :--- |
| CAUSE | The connection was broken while data was being received. |
| COUNTERMEASURES | Check to make sure the cabinets are on and available for play. |

| DISPLAY | Error6802 <br> Network Setting Many Main. |
| :--- | :--- |
| CAUSE | Multiple cabinets in the network were set to MAIN. |
| COUNTERMEASURES | Under the LINDBERGH RED EX settings, go to SYSTEM TEST MENU $\rightarrow$ <br> GAME TEST MODE $\rightarrow$ NETWORK SETTING and change the MODE setting. |

| DISPLAY | Error6803 <br> Network Setting Same Cabinet ID. |
| :--- | :--- |
| CAUSE | Multiple cabinets in the network were assigned the same ID. <br> (CABINET ID is set under NETWORK SETTING $\rightarrow$ CABINET ID in GAME <br> TEST MODE.) |
| COUNTERMEASURES | Under the LINDBERGH RED EX settings, go to SYSTEM TEST MENU $\rightarrow$ <br> GAME TEST MODE $\rightarrow$ NETWORK SETTING and change the CABINET ID <br> setting. |

| DISPLAY | Error6804 <br> Network Setting Error. |
| :--- | :--- |
| CAUSE | There was a problem sending data during communication due to incorrect <br> settings or some other reason. |
| COUNTERMEASURES | Under the LINDBERGH RED EX settings, go to SYSTEM TEST MENU $\rightarrow$ <br> GAME TEST MODE $\rightarrow$ NETWORKSETTING and check to make sure all the <br> settings are correct. |

## MOTOR-RELATED ERRORS

| DISPLAY | Error7301 <br> Serial AlarmEncoder. |
| :--- | :--- |
| CAUSE | The encoder alarm went off. |
| COUNTERMEASURES | Check the servo driver motor wiring and then reboot the cabinet. |

| DISPLAY | Error7302 <br> Serial AlarmOvercurrent. |
| :--- | :--- |
| CAUSE | The overcurrent alarm went off. |
| COUNTERMEASURES | Turn off the cabinet for a brief period of time and then turn it back on. |

| DISPLAY | Error7303 <br> Serial AlarmOverheat. |
| :--- | :--- |
| CAUSE | The overheat/overload alarm went off. |
| COUNTERMEASURES | Turn off the cabinet for a brief period of time and then turn it back on. |

| DISPLAY | Error7304 <br> Serial DataError. |
| :--- | :--- |
| CAUSE | Communication data was corrupt. |
| COUNTERMEASURES | Check the wire to the LINDBERGH RED EX COM1 port. |

| DISPLAY | Error7702 <br> Serial TimeOut. |
| :--- | :--- |
| CAUSE | There was no response from the serial motor driver or it is not connected. |
| COUNTERMEASURES | Check the wire to the LINDBERGH RED EX COM1 port. |

| DISPLAY | Error7703 <br> Serial Initial. |
| :--- | :--- |
| CAUSE | The software could not be reset during the initialization process. |
| COUNTERMEASURES | Reboot the cabinet. |

| DISPLAY | Error7704 <br> Serial ZeroSearch. |
| :--- | :--- |
| CAUSE | The cabinet is not moving due to a home-position search error. |
| COUNTERMEASURES | Check to make sure the cabinet is not stuck for some reason. |

| DISPLAY | Error7705 <br> Serial CenterSearch. |
| :--- | :--- |
| CAUSE | The cabinet is not moving due to a center search error. |
| COUNTERMEASURES | Check to make sure the cabinet is not stuck for some reason. <br> Check to make sure the movement lock has not come off. <br> Check to make sure there is nothing around the cabinet obstructing its <br> movement. |

| DISPLAY | Error7801 <br> Roll Volume |
| :--- | :--- |
| CAUSE | The wrong value came back from the roll volume. |
| COUNTERMEASURES | Check to make sure there is nothing wrong with the roll volume wiring. |

## 10 HANDLE

- In order to prevent electric shock and short circuit hazards, be sure to turn the power off before performing work. However, the unit must be switched on when using test mode. Do not touch any part of the unit except those areas indicated.
- Be careful not to damage the wires. Damaged wires may cause electric shock or short circuit.
- Exercise due caution in performing soldering work. If soldering iron is handled carelessly, there could be fires or burns.
- Be sure to perform volume's move value setting in the INPUT ASSIGNMENTS in the Game Test Mode after replacing or adjusting the Volume. Failure to do so could prevent the game from operating properly.

## 10-1 FRONT BRAKE VOLUME

A tamperproof screw wrench (for M4) is required for the following procedure.

## 10-1-1 Adjusting the Volume

Turn the power off.
2
Remove the 4 tamperproof screws and take the VR cover off.

10-1-1 FIG. 01

VR COMEP

10-1-1 FIG. 02

Loosen the 2 screws, move the VR bracket, and adjust the angle and way the gears fit together. The brake lever should be released, and the D-cut surface of the volume rotating shaft should be in the position shown in the figure when doing so.

10-1-1 FIG. 03
10-1-1 FIG. 04

10-1-1 FIG. 05

4
After performing the adjustment, use the 2 screws to fully tighten the VR bracket on.
5
Operate the brake lever and check to make sure the gears rotate smoothly.

Refer to Step 2 and attach the VR cover.

7
Turn on the power and be careful not to touch the motorcycle mechanism when doing so. The motorcycle mechanism initialization operation will be performed automatically after the power is turned on.

Set the volume value on the INPUT ADJUSTMENT Screen in Game Test Mode. The recommended value for the front brake volume is " $30 \mathrm{H} \pm 8 \mathrm{H}$ " with the brake lever released. Check to make sure the value increases when the brake lever is pulled. (See "9-3-5 INPUT ADJUSTMENT.")

## 10-1-2 Replacing the Volume

A replacement volume (220-5753) and 3 heat-shrinkable tubes (310-5029-F20) are required.
The following tools and soldering equipment will be used:

- Tamperproof screw wrench (for M4)
- Nipper
- Cutter
- Wire stripper
- Soldering iron
- Industrial dryer

1 Turn the power off.
2
Refer to Step 2 under "10-1-1 Adjusting the Volume" and remove the VR cover.
3
Remove the 2 screws fastening the VR bracket in place and take the volume off including the VR bracket.

10-1-2 FIG. 01
10-1-2 FIG. 02

Remove the 2 hexagon socket screws and pull the gear off the volume shaft.

10-1-2 FIG. 03

Remove the nut fastening the VR bracket in place and take the volume off the VR bracket. (See 10-1-2 FIG. 03.)

8
The wires connected to the volume will proceed to be used. Use a tool such as nippers or a cutter to remove the old heat-shrinkable tubes from the places where the wires are connected.

10-1-2 FIG. 04

7
Use a soldering iron to melt the solder and separate the wires from the old volume. Be careful when using the soldering iron.

10-1-2 FIG. 05

If the exposed conductive wire at the end is less than 5 mm , use a tool such as a wire stripper or cutter to cut the coating back.

9
Pass the wires through the 3 heat-shrinkable tubes.
10
Solder the wires to the terminals on the new volume. Check the wiring diagram and be careful not to mix up the wires.

11
Cover the soldered parts with the heat-shrinkable tubes and apply heat with an industrial dryer until the heat-shrinkable tubes tightly cover the soldered parts.

12
Refer to Steps 3-5 and work in reverse order to attach the volume.
13
Refer to "10-1-1 Adjusting the Volume" and adjust the volume.

## stop IMPORTANT

- Be sure to use the designated grease. Using undesignated grease can cause parts damage.
- Do not apply grease to locations other than as specified. Doing so may create a risk of operational problems and deterioration of parts.
- The designated periods for greasing serve only as a guide. Whenever there are squeaks or other anomalies, apply grease at designated locations.

Use spray grease once every three months to grease up the gear mesh portion of the constituent parts. Use "Grease Mate" (part number 090-0066) for the spray grease.
Refer to Steps 1 and 2 under "10-1-1 Adjusting the Volume" and remove the VR cover. Apply grease between the gears that turn the volume shaft.

## 10-2 ACCELERATOR VOLUME

## 10-2-1 Adjusting the Volume

A tamperproof screw wrench (for M4) is required for the following procedure.

3
Loosen the screw, move the VR bracket, and adjust the angle and way the gears fit together. The accelerator should be released, and the D-cut surface of the volume rotating shaft should be in the position shown in the figure when doing so.

Scran

10-2-1 FIG. 03

10-2-1 FIG. 04

10-2-1 FIG. 05

After performing the adjustment, use the screw to fully tighten the VR bracket on.

Operate the accelerator and check to make sure the gears rotate smoothly.

Refer to Step 2 and attach the VR cover.

Turn on the power and be careful not to touch the motorcycle mechanism when doing so. The motorcycle mechanism initialization operation will be performed automatically after the power is turned on.

Set the volume value on the INPUT ADJUSTMENT Screen in Game Test Mode. The recommended value for the accelerator volume is " $30 \mathrm{H} \pm 8 \mathrm{H}$ " with the accelerator released. Check to make sure the value increases when the accelerator is twisted. (See "9-3-5 INPUT ADJUSTMENT.")

## 10-2-2 Replacing the Volume

A replacement volume (220-5753) and 3 heat-shrinkable tubes (310-5029-F20) are required.
The following tools and soldering equipment will be used:

- Tamperproof screw wrench (for M4)
- Nipper
- Cutter
- Wire stripper
- Soldering iron
- Industrial dryer

## 1 Turn the power off.

Refer to Step 2 under "10-2-1 Adjusting the Volume" and remove the VR cover.

## 3

Remove the screw and take the volume off.

10-2-2 FIG. 01
10-2-2 FIG. 02

Remove the 2 hexagon socket screws and pull the gear off the volume shaft.

10-2-2 FIG. 03

Remove the nut fastening the VR bracket in place and take the volume off the VR bracket. (See 10-2-2 FIG. 03.)

The wires connected to the volume will proceed to be used. Use a tool such as nippers or a cutter to remove the old heat-shrinkable tubes from the places where the wires are connected.

10-2-2 FIG. 04

7
Use a soldering iron to melt the solder and separate the wires from the old volume. Be careful when using the soldering iron.

10-2-2 FIG. 05

If the exposed conductive wire at the end is less than 5 mm , use a tool such as a wire stripper or cutter to cut the coating back.

9
Pass the wires through the 3 heat-shrinkable tubes.
10
Solder the wires to the terminals on the new volume. Check the wiring diagram and be careful not to mix up the wires.

11
Cover the soldered parts with the heat-shrinkable tubes and apply heat with an industrial dryer until the heat-shrinkable tubes tightly cover the soldered parts.

12
Refer to Steps 3-5 and work in reverse order to attach the volume.

Refer to "10-2-1 Adjusting the Volume" and adjust the volume.

## stop IMPORTANT

- Be sure to use the designated grease. Using undesignated grease can cause parts damage.
- Do not apply grease to locations other than as specified. Doing so may create a risk of operational problems and deterioration of parts.
- The designated periods for greasing serve only as a guide. Whenever there are squeaks or other anomalies, apply grease at designated locations.

Use spray grease once every three months to grease up the gear mesh portion of the constituent parts.
Use "Grease Mate" (part number 090-0066) for the spray grease.
Refer to Steps 1 and 2 under "10-2-1 Adjusting the Volume" and remove the VR cover. Apply grease between the gears that turn the volume shaft.

10-2-3 FIG. 01

## 10-3 HANDLE VOLUME

## 10-3-1 Adjusting the Volume

Turn the power off.

10-3-1 FIG. 01

HANDEFRONT COYRRLDB

10-3-1 FIG. 02

3
Loosen the 2 screws, move the VR bracket, and adjust the angle and way the gears fit together. The handle should be in the center position, and the D-cut surface of the volume rotating shaft should be in the position shown in the figure when doing so.

After performing the adjustment, use the 2 screws to fully tighten the VR bracket on.

5
Operate the handle and check to make sure the gears rotate smoothly.

Refer to Step 2 and attach Handle Front Cover Lid B.
7
Turn on the power and be careful not to touch the motorcycle mechanism when doing so. The motorcycle mechanism initialization operation will be performed automatically after the power is turned on.

8
Set the volume value on the INPUT ADJUSTMENT Screen in Game Test Mode. The recommended value for the handle volume is " $30 \mathrm{H} \pm 8 \mathrm{H}$ " with the handle in the center position. Check to make sure the value decreases when the handle is turned to the left and increases when it is turned to the right. (See "9-3-5 INPUT ADJUSTMENT.")

## 10-3-2 Replacing the Volume

A replacement volume (220-5753) and 3 heat-shrinkable tubes (310-5029-F20) are required.
The following tools and soldering equipment will be used:

- Tamperproof screw wrench (for M4)
- Nipper
- Cutter
- Wire stripper
- Soldering iron
- Industrial dryer

1 Turn the power off.
2
Remove the 2 screws and take the handle front tube bracket off. Be careful not to damage the wires when doing so.

10-3-2 FIG. 01

10-3-2 FIG. 11

9
Remove the 2 hexagon socket screws and pull the gear off the volume shaft.

10
Remove the nut fastening the VR bracket in place and take the volume off the VR bracket. (See 10-3-2 FIG. 03.)

11
The wires connected to the volume will proceed to be used. Use a tool such as nippers or a cutter to remove the old heat-shrinkable tubes from the places where the wires are connected.

10-3-2 FIG. 13
12
Use a soldering iron to melt the solder and separate the wires from the old volume. Be very careful when using the soldering iron.

13If the exposed conductive wire at the end is less than 5 mm , use a tool such as a wire stripper or cutter to cut the coating back.

Pass the wires through the 3 heat-shrinkable tubes.

Solder the wires to the terminals on the new volume. Check the wiring diagram and be careful not to mix up the wires.

Cover the soldered parts with the heat-shrinkable tubes and apply heat with an industrial dryer until the heat-shrinkable tubes tightly cover the soldered parts

Refer to Steps 2-10 and work in reverse order to attach the volume, handle front tube bracket, Handle Front Cover Lid A, and handle front cover.

- Be sure to use the designated grease. Using undesignated grease can cause parts damage.
- Do not apply grease to locations other than as specified. Doing so may create a risk of operational problems and deterioration of parts.
- The designated periods for greasing serve only as a guide. Whenever there are squeaks or other anomalies, apply grease at designated locations.

Use spray grease once every three months to grease up the gear mesh portion of the constituent parts.
Use "Grease Mate" (part number 090-0066) for the spray grease.
Refer to Steps 1 and 2 under "10-3-1 Adjusting the Volume" and remove Handle Front Cover Lid B.
Apply grease between the gears that turn the volume shaft.

10-3-3 FIG. 01

## 11 MOTORCYCLE MECHANISM

Always disengage the power before beginning work. Otherwise there could be an electric shock or short circuit. Note that when using TEST mode there will be electricity running through the machine. Do not touch any parts that are not specified in these directions.

- Be careful not to damage the wires. Damaged wires may cause electric shock or short circuit or present a fire risk.
- Be very careful when soldering. Handling a soldering iron carelessly may result in a fire or a burn.

## 11-1 ROLL (LEAN) VOLUME

11-1-1 Adjusting the Volume
$\qquad$
2
Remove the 6 truss screws and take the front shaft cover off.

11-1-1 FIG. 01

11-1-1 FIG. 02

Loosen the 2 screws, move the VR bracket, and adjust the angle and way the gears fit together. The motorcycle mechanism should be in the center position, and the D-cut surface of the volume rotating shaft should be in the position shown in the figure when doing so.

After performing the adjustment, use the 2 screws to fully tighten the VR bracket on.

## 5

Refer to Step 2 and attach the front shaft cover.

Operate the motorcycle mechanism and check to make sure the gears rotate smoothly.

7
Turn on the power and be careful not to touch the motorcycle mechanism when doing so. The motorcycle mechanism initialization operation will be performed automatically after the power is turned on.

Set the volume value on the INPUT ADJUSTMENT Screen in Game Test Mode. The recommended value for the roll volume is " $80 \mathrm{H} \pm 8 \mathrm{H}$ " with the motorcycle mechanism in the center position. Check to make sure the value decreases when the motorcycle mechanism is tilted to the right and increases when it is tilted to the left. (See "9-3-2 INPUT TEST.")

## 11-1-2 Replacing the Volume

A replacement volume (220-5753) and 3 heat-shrinkable tubes (310-5029-F20) are required.
The following tools and soldering equipment will be used:

- Tamperproof screw wrench (for M4)
- Nipper
- Cutter
- Wire stripper
- Soldering iron
- Industrial dryer

1 Turn the power off.
2
Refer to "11-1-1 Adjusting the Volume" and remove the front shaft cover.
3
Undo the cord clamp.

Remove the 2 screws and take the volume off. Be careful not to drop or lose the screws when doing so.

11-1-2 FIG. 02

11-1-2 FIG. 03

11－1－2 FIG． 04

6Remove the nut fastening the VR bracket in place and take the volume off the VR bracket．（See 11－1－2 FIG． 04．）

7
The wires connected to the volume will proceed to be used．Use a tool such as nippers or a cutter to remove the old heat－shrinkable tubes from the places where the wires are connected．

11－1－2 FIG． 05

Use a soldering iron to melt the solder and separate the wires from the old volume．Be very careful when using the soldering iron．

11－1－2 FIG． 06

If the exposed conductive wire at the end is less than 5 mm , use a tool such as a wire stripper or cutter to cut the coating back.

Pass the wires through the 3 heat-shrinkable tubes.

Solder the wires to the terminals on the new volume. Check the wiring diagram and be careful not to mix up the wires.

Refer to Steps 3-6 and work in reverse order to attach the volume.

14 Refer to "11-1-1 Adjusting the Volume" and check the volume.

- Be sure to use the designated grease. Using undesignated grease can cause parts damage.
- Do not apply grease to locations other than as specified. Doing so may create a risk of operational problems and deterioration of parts.
- The designated periods for greasing serve only as a guide. Whenever there are squeaks or other anomalies, apply grease at designated locations.

Use spray grease once every three months to grease up the gear mesh portion of the constituent parts.
Use "Grease Mate" (part number 090-0066) for the spray grease.
Refer to Steps 1 and 2 under "11-1-1 Adjusting the Volume" and remove the front shaft cover. Apply grease between the gears that turn the volume shaft.

11-1-3 FIG. 01

## 11-2 REPLACING THE SIDE GUIDE PLATES

The side guide plates are important parts which prevent accidents. Always inspect them before the doors open every day to make sure they are not damaged and have not come off. If the game is played despite the side guide plates being damaged or having come off, it could result in an accident such as the customer getting his or her fingers caught.

The following work requires a hexagon wrench with a WAF of 2.5 mm .

Turn the power off.

Remove the 2 hexagon socket screws and take the side guide plate off.

11-2 FIG. 01

Affix STICKER W PINCH HLT ENG to the new side guide plate as shown in the figure.

11-2 FIG. 03

11－2 FIG． 04
5
Adjust the side guide plate so that the clearance between it and the seat is about 1 mm ，and fully tighten the 2 hexagon socket screws．

11－2 FIG． 05

## 11-3 REPLACING THE VIBRATION UNIT HARNESS

If the motorcycle mechanism does not vibrate, replace the vibration unit harness. If that does not fix it, replace the vibration unit itself.
The following work requires nippers and a hexagon wrench with a WAF of 2.5 mm .

## 1 Turn the power off.

2
Remove the 6 hexagon socket screws and take the switch plate off. Be careful not to damage the wires when doing so.

11-3 FIG. 03

4
Take Tank Center off.

11-3 FIG. 04

5 Remove the 4 screws and take Tank L off.

11-3 FIG. 05
11-3 FIG. 06

Refer to Step 5 and take Tank R off.

Using the nippers, cut the cable tie. Be careful not to damage the wires when doing so.

11-3 FIG. 07

NOTE：When attaching it，use 2 cable ties that have been joined together to fasten the core and wires together．Cut the extra part of the cable tie off．Be careful not to damage the wires when doing so．

11－3 FIG． 08

11－3 FIG． 09

ERDA PATTOFCABLETE

11－3 FIG． 10

Undo the 3 cord clamps．

11－3 FIG． 11

Detach the connector.

11-3 FIG. 12

11-3 FIG. 14

11-3 FIG. 15

12 Undo the clamps and open the core.

13
Use the nippers to cut the cable tie, and take the core out. Be careful not to damage the wires when doing so.
When attaching it, wrap the wires around the core 2.5 times and fasten them to it using a cable tie.

11-3 FIG. 17

11-3 FIG. 18

14 Undo the 2 cord clamps.

11-3 FIG. 19

15
Detach the connector and replace the vibration unit harness.

## 12 COIN SELECTOR

## 12－1 CLEANING THE COIN SELECTOR

stop IMPORTANT
－Remove and clean smears by using a soft cloth dipped in water or diluted chemical detergent and then squeezed dry．
－Never apply machine oil，etc．to the Coin Selector．
－After cleaning the Coin Selector，insert a regular coin in the normal working status and ensure that the Selector correctly functions．

The Coin Selector should be cleaned once a month．When cleaning，follow the procedure below：
1 Turn the power off．
2
Unlock the coin chute door with the master key and open it．

12－1 FIG． 01

Open the gate and dust off by using a soft brush．Remove and clean smears by using a soft cloth dipped in water or diluted chemical detergent and then squeezed dry．

12－1 FIG． 02

Remove the cradle．When removing the retaining ring（E ring），be very careful so as not to bend the rotary shaft．

12－1 FIG． 03
（After wiping off dirt，wipe away moisture with a dry cloth and make sure that the coin selector is completely dry．

## 12-2 HANDLING THE COIN JAM

If the coin is not rejected when the REJECT button is pressed, open the coin chute door and open the selector gate. After removing the jammed coin, put a normal coin in and check to see that the selector correctly functions.

## 12-3 COIN INSERTION TEST

Once every month, when performing the Coin SW Test, simultaneously check the following:
$\square$ Does the Coin Meter count satisfactorily?
$\square$ Does the coin drop into the Cashbox correctly?
$\square$ Is the coin rejected when inserted while keeping the Reject Button pressed down?
$\square$ Are extra coins and incorrect coins properly returned?

12-3 FIG. 01

## 13 DLP PROJECTOR

## ACAUTION

The DLP projector is adjusted prior to leaving the factory. Avoid any unnecessary adjustment. Failure to observe this can have a bad influence upon the players' or the customers' physical conditions.

## stop IMPORTANT

- If the adjustment method in this manual does not resolve the problem contact the office listed in this manual or your supplier.
- "Snow" on the screen/changes in brightness for a short period are due to the high pressure mercury lamp in the projector. This is not a defect and does not need repairs.
- The life of the high pressure mercury lamp is the average number of hours $50 \%$ of lamps last for. Therefore a life of 8,000 hours does not mean that the lamp cannot last beyond 8,000 hours.
- There is no way of knowing when the lamp is going to cease to function. Once it ceases to function, the DLP projector will be unable to display anything and the product cannot be used. Have a spare lamp ready at all times.
- Do not stick tape, stickers or anything else onto the screen. Any kind of adhesive may damage the surface of the screen.

[^1]
## 13-1 CLEANING THE SCREEN

## stop IMPORTANT

Since the Projector screen is susceptible to damage, pay careful attention to its handling. Do not clean the screen with volatile chemicals, solvents or alkaline/ acidic cleaners.

Clean the screen surface once a week.
Dip a soft cloth in water 40 degrees centigrade or below, wring it out firmly, and use it to gently wipe the screen. If there are stains that can't be removed with warm water, use a neutral detergent diluted to $2-3 \%$.
Refrain from using other chemicals, solvents, bleaches and cleaners because they may affect the screen.
Also do not use chemically-treated cloths.
The screen is easily damaged, so avoid scratching it with hard objects or striking it with a duster or other objects. If the stains are serious, contact the office detailed in this manual or the point-of-purchase for this product.

13-1 FIG. 01

## 14 REPLACING THE FLUORESCENT AND HALOGEN LAMPS

## ©WARNING

- When working with the product, be sure to turn the power off. Working with the power on may cause an electric shock or short circuit.
- There is danger that hot lamps can cause burns. Exercise due caution when replacing lamps.
- Use lamps of the specified ratings. Using lamps with different ratings may cause fires or damage.
- Such things as deteriorated insulation in lighting fixtures can cause a short circuit and/or smoke. Make sure there are no abnormalities. For example, check if you can smell anything burning, if any sockets have been discolored and if the lamp has to be replaced frequently.

## ©CAUTION

- To perform work safely and securely, be sure to prepare a step which is in a secure and stable condition. Performing work without using the step can cause violent falling down accidents.
- Be careful when handling the plastic made parts. Failure to observe this may cause injury due to damage or fragments resulting from damage.

## 14-1 REPLACING THE FLUORESCENT LAMP

Remove the 4 marquee screws. and take marquee off..

## 2 Carefully Replace Fluorescent lamp..

## 15 PERIODIC INSPECTION

## ©WARNING

- Be sure to check once a year to see whether power cords are damaged, the plug is securely inserted, dust has accumulated between the socket outlet and the power plug, etc. Using the product with accumulated dust can cause fire and electric shock.
- Periodically, around once a year, get in touch with the office herein stated or the distributor, etc. where the product was purchased from, regarding internal cleaning. Using the product with accumulated dust in the interior can cause a fire or accident. Note that professional cleaning will require a fee.
- There is the danger of accidents involving electrical shorts circuits or fire caused by factors such as the deterioration of insulation in electrical and electronic equipment over time. Check that there are no abnormalities such as odors from burning.
- Do not use a water jet (high pressure washing device) or hose to clean this product. It was not designed to be cleaned by a water jet. Water could get inside and cause electrocution or short circuits. The product could also be damaged in such a way that it is difficult to repair.

NOTE: The Sservice Manual referenced in the table is the separate "LINDBERGH RED EX Service Manual."

| ITEMS | DESCRIPTION | PERIOD | REFERENCE |
| :---: | :---: | :---: | :---: |
| CABINET | Confirm that adjusters contact floor | Daily | 2 |
| HANDLE | Inspect volume | Monthly | 10 |
|  | Inspect gear meshing | Every 3 months | 10 |
|  | Apply grease | Every 3 months | 10 |
| MOTORCYCLE MECHANISM | Inspect volume | Monthly | 11-1-1 |
|  | Inspect gear meshing | Every 3 months | 11-1-1 |
|  | Apply grease | Every 3 months | 11-1-3 |
|  | Inspect side guide plates | Daily | 11-2 |
| VIBRATION UNIT | Inspect screws for looseness | Monthly | 11-3 |
| COIN CHUTE TOWER | Coin switch inspection | Monthly | 12-1 |
|  | Coin insertion test | Monthly | 12-3 |
|  | Cleaning | Monthly | 12-1 |
|  | Inspect door cushions | Monthly | See next page |
| DLP PROJECTOR | Screen cleaning | Weekly | 13-1 |
|  | Check screen adjustment | Monthly or when moving | 13 |
| LINDBERGH RED EX | Memory test | Monthly | Service Manual, 4 |
|  | Settings check | Monthly | Service Manual, 4 |
|  | Cleaning | Every 3 months | 17-2 |
| BILLBOARD | Inspect lighting fixtures (fluorescent lamp) | As appropriate | 14-1 |
| SPEAKER UNIT | Inspect lighting fixtures (halogen lamp) | As appropriate | 14-2 |
| POWER CABLE | Inspection, Cleaning | 1 year | 6-10 |
| CABINET INTERIOR | Cleaning | 1 year | As above |
| CABINET SURFACES | Cleaning | As appropriate | See next page |

## Cleaning the Cabinet Surfaces

When the cabinet surfaces become dirty, remove stains with a soft cloth soaked in water or diluted (with water) chemical detergent and then wrung dry. To avoid damaging the finish, do not use such solvents as thinner, benzene, etc. (other than ethyl alcohol) or abrasives (bleaching agent and chemical dust-cloth).

Some general-purpose household, kitchen, and furniture cleaning products may contain strong solvents that degrade plastic parts, coatings, and print. Before using any cleaning product, read the product's cautionary notes carefully and test the product first on a small area that is not highly visible.

## Replacing the Door Cushions

If the coin chute or cash box doors produce a loud vibrating noise, replace the door cushions.

1 Turn the power off.
2
Unlock the coin chute door with the master key and open it. Unlock the cash b door with the key and open it.

15 FIG. 01

15 FIG. 02

## 16 TROUBLESHOOTING

## 16-1 TROUBLESHOOTING TABLE

#### Abstract

\section*{WARNING} - The work described below should be carried out by the site maintenance personnel or other qualified professional. Work carried out by personnel without the necessary skill or technology can cause accident. - If no improvements can be noted even after the following measures have been taken, disengage the power and contact the point of purchase or the office indicated in these instructions. If the power is left on while there is an abnormality, a fire, electric shock or other serious accident can occur. - When working with the product, be sure to turn the power off. Working with the power on may cause an electric shock or short circuit. - Be careful not to damage the wires. Damaged wires may cause an electric shock, short circuit or present a risk of fire. - Once the reason that the breaker or circuit protector activated has been removed, restore the breaker or circuit protector to its original condition. If the product is used while the reason for activation has not yet been removed, heat and/or fire could be generated.

If a problem occurs, first inspect the connection of any wiring connectors.

NOTE: The Service Manual referenced in the table is the separate "LINDBERGH RED EX Service Manual."

## 16-1 TABLE 01

| PROBLEMS | CAUSE | COUNTERMEASURES |
| :--- | :--- | :--- |
| With main switch <br> ON, no activation. | Power is not supplied. | Securely insert the power plug into the <br> plug socket. |
|  | Power supply/voltage is not correct. | Make sure that power supply/voltage is <br> correct. |
|  | The circuit protector functioned due to the <br> momentary overload. | After eliminating the cause of overload, <br> reinstate the AC unit's circuit protector. <br> <See below> |
| Billboard's <br> fluorescent lamp does <br> not light up. | Connector is not properly connected. | Firmly connect the connector between <br> cabinet and billboard. |
|  | Fluorescent lamp or glow lamp has <br> expired. | Replace the fluorescent lamp and/or glow <br> lamp. $<$ See 14-1> |
| There is sound and <br> the fluorescent lamp <br> is on, but the monitor <br> is completely black. | Video signal connector or monitor power <br> connector is not properly connected. | Check to make sure the connector between <br> the monitor and game board is properly <br> connected. |
|  | Characteristic of DLP projector. | Depending on the model, it may take <br> approx. 2 minutes for the video signal to <br> come through after turning the power on. |

| PROBLEM | CAUSE | COUNTERMEASURE |
| :---: | :---: | :---: |
| No sound. | Volume is not properly adjusted. | Adjust the sound on the switch unit. <See 9-1> |
|  | Connector is not properly connected. | Check the connectors going to the game board, amps, speakers, and volume. |
|  | Problem with board, amps, or speakers. | Check by performing the speaker test. <See Service Manual, 4> |
| The color on the DLP projector screen is incorrect. | Video signal connector is not properly connected. | Check to make sure the video signal connector is properly connected and fastened in place. |
|  | Faulty screen adjustment. | Perform appropriate adjustments. <See chapter 13> |
| Monitor screen shakes or shrinks. | Power supply/voltage is not correct. Power is not sufficient. | Make sure that power supply/voltage is correct. |
| Switch or volume input does not work. | Connector is not properly connected. | Check the connection of the connector between the I/O board and the cabinet. |
|  |  | Check the connection of the connector between the I/O board and the game board. |
|  |  | Check the power to the I/O board. |
| Handle, accelerator, or brakes do not work as intended. | Faulty volume setting. | Configure the setting in Test Mode. <See 9-3-5> |
|  | Faulty volume attachment or gear meshing. | Make adjustments and check them in Test Mode. <See chapter 10> |
|  | Connector is not properly connected. | Check the connection of the handle, accelerator, and brake connectors. |
|  | Volume is broken. | Replace the volume. $<$ See chapter 10> |
| Motorcycle mechanism does not move as intended. | Faulty initialization operation. | Turn the power on again and make sure the initialization operation finishes properly. |
|  | Faulty volume attachment or gear meshing. | Make adjustments and check them in Test Mode. <See 11-1-1> |
|  | Volume is broken. | Replace the volume. $<$ See 11-1-2> |
|  | Wire is broken or disconnected. | Check wires around moving parts for poor contact. |
|  |  | When replacing wires, fasten them down where they will not come in contact with moving parts. |
| Motorcycle mechanism does not move. | Faulty initialization operation. | Make sure the initialization operation finishes properly. |
|  | Setting is not correct. | Check the LEAN setting on the GAME ASSIGNMENTS Screen. < See 9-3-4> |
|  | Connector is not properly connected. | Check the connection of the connectors between the game board and the servo driver, and between the servo driver and the servomotor. |
|  | Servomotor's thermal element was triggered. | Rise in internal temperature triggered element. Once it cools down, it will automatically recover. |
|  | Servo driver's fuse blew due to momentary overload. | Contact the point of purchase for this product. |

| PROBLEM | CAUSE | COUNTERMEASURE |
| :---: | :---: | :---: |
| Network play does not work. | Network play settings are not correct. | Configure the settings correctly. <See 9-3-6 and 19-3> |
|  | Network cable has come loose. | Connect the network cable properly. <See 19-2> |
|  | Network cable cannot be properly connected. | Connect the network cable properly. <See 19-2> |
|  | Network cable is broken. | Replace the network cable. Contact the point of purchase for this product. |
| Halogen lamp does not turn on. | Halogen lamp has expired. | Replace the halogen lamp. $<$ See 14-2> |
|  | Fuse is blown. | Replace the fuse. $<$ See 16-2> |
| No vibration. | Setting is not correct. | Check the VIBRATION setting on the GAME ASSIGNMENTS Screen. <See 9-3-4> |
|  | Connector is not properly connected. | Check the connection of the connector between the motor control board and the motor. |
|  | Motor has expired. | Replace the vibration unit. <See 11-3> |
| Leader lamp, foot lamp, or tail lamp does not turn on. | Connector is not properly connected. | Check the connection of the connector. |

## CIRCUIT PROTECTOR

Functions due to the activation of bimetal. To restore the function, wait for approximately 1 minute or longer until the bimetal cools off. (Press the button.)

16-1 FIG. 01

## 17 GAME BOARD (LINDBERGH RED EX)

The work described below should be carried out by the site maintenance personnel or other qualified professional. Work carried out by personnel without the necessary skill or technology can cause accident.

- In order to prevent electric shock and short circuit hazards, be sure to turn power off before performing work.
- Be careful not to damage the wires. Damaged wires may cause electric shock or short circuit or present a fire risk.
- Do not use this product with connectors other than those that were connected and used with the LINDBERGH RED EX at the time of shipping. Do not carelessly connect wires to connectors that were not used at the time of shipping, as this may cause overheating, smoke or fire damage.
- When connecting the connectors, be sure to attach them correctly. There is only one correct way in which they must be connected. Attempting to connect them incorrectly may cause damage to the pins on the connectors, and cause electric shock, short circuit or fire.

## $\triangle C A U T I O N$

In this product, setting changes are made during the Test Mode. The LINDBERG RED EX need not be operated. Use the LINDBERGH RED EX, etc. as is with the same setting made at the time of shipment so as not to cause electric shock and malfunctioning.

## sTop IMPORTANT

Static electricity from your body may damage some electronics devices on the IC board. Before handling the IC board, touch a grounded metallic surface so that the static electricity can be discharged.

## 17-1 CLEANING THE LINDBERGH BOARD

## STOP IMPORTANT

Be sure to clean game boards once in 3 months. Dust accumulating in game boards may not function properly.

Once every 3 months remove the LINDBERGH RED EX from the cabinet and use a vacuum cleaner to clean around the LINDBERGH RED EX's air vents and installation area.
1
Refer to 17-1, and remove the LINDBERGH RED EX from the cabinet.
2
Clean around the air vent of LINDBERGH boards with a vacuum cleaner.

Clean around installment parts of LINDBERGH RED EX in the cabinet with a vacuum cleaner. Be sure not to damage wirings and boards. Electronic devices on boards may damage by static electricity, and be sure not to vacuum electronic devices by a vacuum cleaner.

## STOP IMPORTANT

- With the key chip inserted into it, this LINDBERGH RED EX serves as a specialpurpose LINDBERGH RED EX for the product.
- Use with the dip switches (DIP SW) on the board at the prescribed settings. If settings do not match the product, an error message will be displayed. In some cases, the game cannot be started.

## ASSY CASE LBJ L 1GB HLT EXP (845-0014D-02)

17-3 FIG. 01

## DIP SW Settings

Use this product with the DIP SW settings shown in the figure below.

17-3 FIG. 02

## 18 NETWORK PLAY

With this product, up to 4 machines can be connected with network (LAN) cables for network play.

## 18-1 INSTALLATION PRECAUTIONS

## WARNING

- The work described below should be carried out by the site maintenance personnel or other qualified professional. Work carried out by personnel without the necessary skill or technology can cause accident.
- Before starting to work, ensure that the Power SW is OFF. Failure to observe this can cause electric shock or short circuit.
- Use care so as not to damage wirings. Damaged wiring can cause electric shock or short circuit.
- Do not touch undesignated places. Touching places not designated can cause electric shock or short circuit.
- Multiple game machines will be connected for network play, so be sure to provide sufficient power according to the number of machines. Make sure that each game machine is supplied with the current listed in this manual. If the machines are used with different electrical specifications, it could result in fires or electrocution.
- The distance between the game machines is limited by the length of the communication cables used, but place them as far apart as possible. If the machines are too close together, it could result in a serious injury such as the player hitting his or her head on the other machine if he or she falls off. The distance between the machines shown in this manual is for when the optional equipment has been installed.
- Do not perform work on inclined surfaces, surfaces with different levels, or grooves. Doing so could result in a serious injury such as the worker tripping and falling. It will also prevent the work from being performed properly.

## ©CAUTION

- To perform work safely, be sure to secure the space corresponding to number of machines to be linked. Failure to observe this can cause accident.
- If the network cables are laid out in the aisles, select a cable cover that is shaped so as not trip the customers. Otherwise customers may trip and fall.
- To prevent accidents and acts of vandalism, cover the network cables with the strongest cover possible.

Supply the appropriate power to each of the 4 game machines. Each one should be supplied with around 15 A of power.

(28) ASSY TUBE (HLT-0400)

## A. WARNING

The DC power wire color for this product is different from previous SEGA titles. Working from the previous wire colors will create a high risk of fire.

The color codes for the wires used in the diagrams in the following chapter are as follows.

A PINK
B SKY BLUE
C BROWN
D PURPLE
E LIGHT GREEN

Wires other than those of any of the above 5 single colors will be displayed by 2 alphanumeric characters.

| 1 | RED |
| :--- | :--- |
| 2 | BLUE |
| 3 | YELLOW |
| 4 | GREEN |
| 5 | WHITE |
| 7 | ORANGE |
| 8 | BLACK |
| 9 | GRAY |

If the right-hand side numeral of the code is 0 , then the wire will be of a single color shown by the left-hand side numeral (see the above).

Note 1: If the right-hand side numeral is not 0 , that particular wire has a spiral color code. The left-hand side character shows the base color and the right-hand side one, the spiral color.
<Example> 51........WHITE/RED

Note 2: The character following the wire color code indicates the size of the wire.

$$
\begin{array}{ll}
\text { U: } & \text { AWG16 } \\
\text { K: } & \text { AWG18 } \\
\text { L: } & \text { AWG20 } \\
\text { None: } & \text { AWG22 }
\end{array}
$$

[^0]:    Before using this product, read this manual carefully to understand the contents herein stated.
    After reading this manual, be sure to keep it near the product or in a convenient place for easy reference when necessary.

[^1]:    The projector remembers adjustments.
    If there is any distortion, etc. that requires adjustment on the TEST screen, use the remote control.
    The average life of the projector's high pressure mercury lamp is approximately 8,000 hours ( $50 \%$ survival). However this may change depending on circumstances.
    The lamp will not last forever. If the screen is dark or continually disappears the lamp must be changed immediately.
    After changing the projector lamp you must reset the timer setting.
