

How to change 'Dropping Arrow (Stopper) ' of Magician's Wheel

2016-Mar-25

1. Detach a Magician-acryl.

2. Remove a spring from a spring bracket.

4. Unscrew a bolt.

3. Remove the existing dropping arrow ass'y.

4. Replace new dropping arrow assembly.

5. Screw a bolt into a bolt hole.

6. Fix the bolt.

7. Fasten the screw.

7. Hang a spring between the bracket and screw.

8. Install a Magician-acryl.

Next Step 1

Confirming 'Adjust Mode'

To activate adjust mode, press & hold SW1+SW3 at the same time while turning on the power.

It gives 1 play automatically for adjusting.

This mode is relevant to the game accuracy by analysing the mechanical condition of the wheel & stopper.

Procedure : refer to operator's manual (page 7)

Next Step 2

Confirming 'Calibration Mode'

To activate calibration mode, press & hold SW2+SW3 at the same time while tuning on the power.

It gives 10 plays automatically for calibration.

This mode is important as it analyses the mechanical condition of the wheel & stopper.

Procedure : refer to operator's manual (page 7)
