

Game Update Instructions

Version: 1.3.0

If you are reading this, I guess you have a VR Agent game and are looking for some sweet upgrades. Well, you've come the right place; this build will improve the way the game handles and adds some new functions to the AO menu.

Download the below 3 files on your personal or work computer and store in a convenient location (Desktop or Downloads folder is fine)

Game update instructions

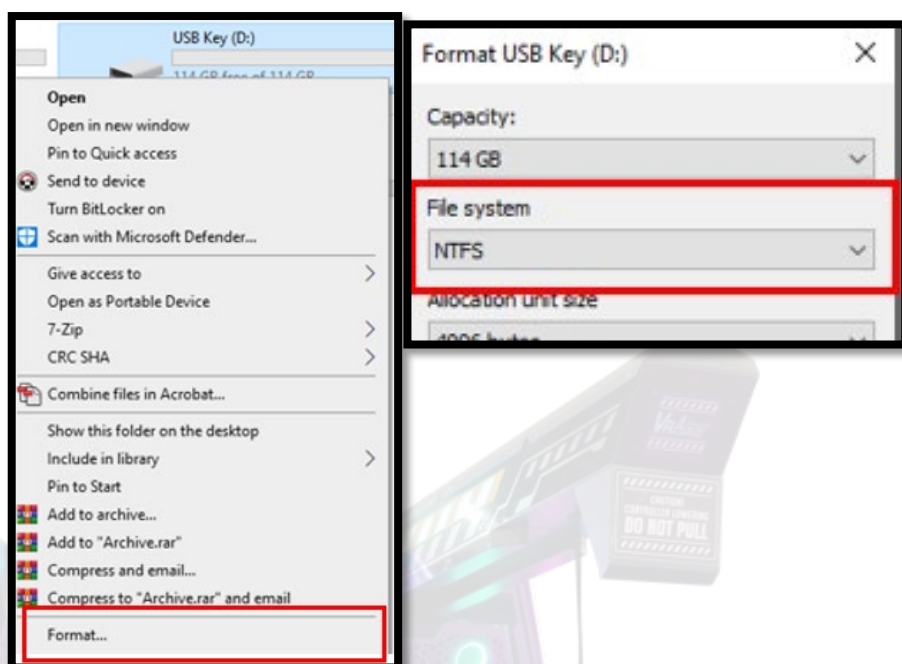

Format a USB key

- * MUST have a greater capacity than 12GB
- ** MUST be formatted to NTFS

Tips:

- Insert a USB key into the same PC you have downloaded the files to.
- Located the USB key in Explorer
- Right click and select Format
- Set the File system as "NTFS"
- Hit start

- Locate the folder with the 3 files in that you downloaded
- Double click the file "*VR Agent Self-Extractor.part1.exe*"
- Follow the instructions on the self-extractor application
- The extraction will take approximately 20 minutes depending on the speed of the PC and USB key
- Once complete remove the key

In the game

- Plug the key into any USB port on your VR Agent computer
- Power on
- The game will automatically install
- Remove key and use on any other games that you have.
